HOW TO PLAY

PLACE YOUR BET

Place a bet on one to four Chance/Free Space cards. After a bet has been placed, the 5x5 cell card you bet on generates numbers ranging from 1 to 60. You can switch each card between being a Chance card and being a Free Space card.

FREE SPACE/CHANCE CARD

- **Free Space card:** The centre cell is a ‘free space’; this acts as a drawn number and increases the odds of making a line.
- **Chance card:** The centre cell is guaranteed to be a multiplier, but free spaces may be added to the card later.

THE MAIN GAME

After the betting time is over, MR. MONOPOLY will pull a lever to place random daubs (free spaces) and multipliers for your cards. A daub acts as a drawn number.

CHANCE MULTIPLIER TYPES

Multipliers are engaged when a ball or several balls are drawn that correspond with the number with the multiplier on the card.

There are three types of Chance multipliers: **Standard** (multiplied payout on any line containing this number), **Line** (pays out if you win this line) and **Global** (any winning line on this card receives the multiplied payout, the line does not need to contain the multiplier). The multiplier types are explained further on page 8.

BALLS AND NUMBERS DRAWN

Once Free Spaces or Multipliers have been added to the cards, the ball drawing starts where 20 out of 60 numbered balls are drawn from the ball drawing machine.

If the number of the drawn ball matches a number on any of your cards, a daub is automatically placed on that number.

The drawn balls are displayed on your screen, including how many balls remain to be drawn.

Red balls have been marked on one or more of your cards. Grey balls do not match any number on any of your cards.

If you complete one or more lines on your card, the bet on that card wins.

THE BONUS GAME

To participate in the Bonus Game, place a bet on ‘3 Rolls’ or ‘5 Rolls’. After betting time is over, random free spaces may land on ‘3 Rolls’ and ‘5 Rolls’ numbers.

If all numbers for either bet spot are drawn (three unique numbers for ‘3 Rolls’ and four unique numbers for ‘5 Rolls’), the Bonus Game will start right after all 20 numbers are drawn.

The Bonus Game is played with two dice. If all the numbers for a ‘3 Rolls’ card are drawn, the dice will be rolled three times. If all the numbers for a ‘5 Rolls’ card are drawn, the dice will be rolled five times. If all the numbers are drawn for both Bonus Game cards, two separate Bonus Games will be played one after the other.

THE MONOPOLY BOARD

The MONOPOLY board has the same layout as a regular MONOPOLY board, with the difference that each property has an attached multiplier.

The Bonus Game starts with houses and hotels randomly being built on some properties, which will increase their multipliers.

SPACES ON THE BOARD

When the dice are rolled, MR. MONOPOLY will walk the corresponding number of spaces on the board. Your total Bonus Game winnings will be displayed and added to your Bonus win.

If MR. MONOPOLY stops on Chance or Community Chest, you can win either a random cash prize or receive a fee.

If MR. MONOPOLY stops on the 'Go to Jail' space; he will move to the jail space. You must roll a double to get out of jail. Going to jail and finishing the Bonus Game while in jail does not affect your previous Bonus winnings.

You get an additional dice roll if a double is rolled during a regular Bonus Game.

INCOME TAXES

Income tax will reduce your Bonus winning by 10%, and Supertax will reduce your winning by 20% if your Bonus winning allows it.

WINNINGS

When MR. MONOPOLY passes 'GO', all the prizes on the board will be doubled.

When no more rolls are left, the Bonus Game is over, and all your Bonus winnings are paid together with your winnings (if any) from the Bingo game.

USER INTERFACE ELEMENTS

GLOBAL MULTIPLIER

Global multipliers have a value of x2 or x3.

If you draw a number with a Global multiplier and get one or more winning lines, your payout for this card is multiplied by this multiplier amount.

Global multipliers multiply all other multipliers (including Line and Standard multipliers).

LINE MULTIPLIER

Line multipliers have a value of 20x or 50x.

Line multipliers are paid out if you make a line with the specified numbers. Your card winnings will be multiplied by the multiplier amount.

DRAWN BALLS

Displays the drawn balls and their numbers and shows how many balls are left to be drawn.

Red balls have been marked on your cards.

Grey balls do not match any number on any of your cards.

STANDARD MULTIPLIER

Standard multipliers have a value of 10x or 20x.

If a number with a Standard multiplier is drawn and that number becomes part of the winning line, your winnings for that card are multiplied by that amount.
