Game Theme and Graphics

The level of seriousness was intentionally scaled down to capture a joyful spirit of Christmas holidays. Player will experience familiar heroes and features from different perspective starting from the beautiful thematic soundtrack that was well-crafted with all classic Christmas sounds. All other attributes of the holiday were masterfully woven in visuals. The warm light of the slot would cause player feel like he is sitting near fireplace at home which is decorated with candies, ribbons, Christmas hats and toys, while outside the window there is an unwelcoming but beautiful snowfall. This atmosphere will undoubtedly make player to recall his happy days of childhood and Buffalo dressed as a Santa enhances everything by bringing Big Win presents. But beware, there will be no presents for the kids who behaved badly during the year!

Game screen

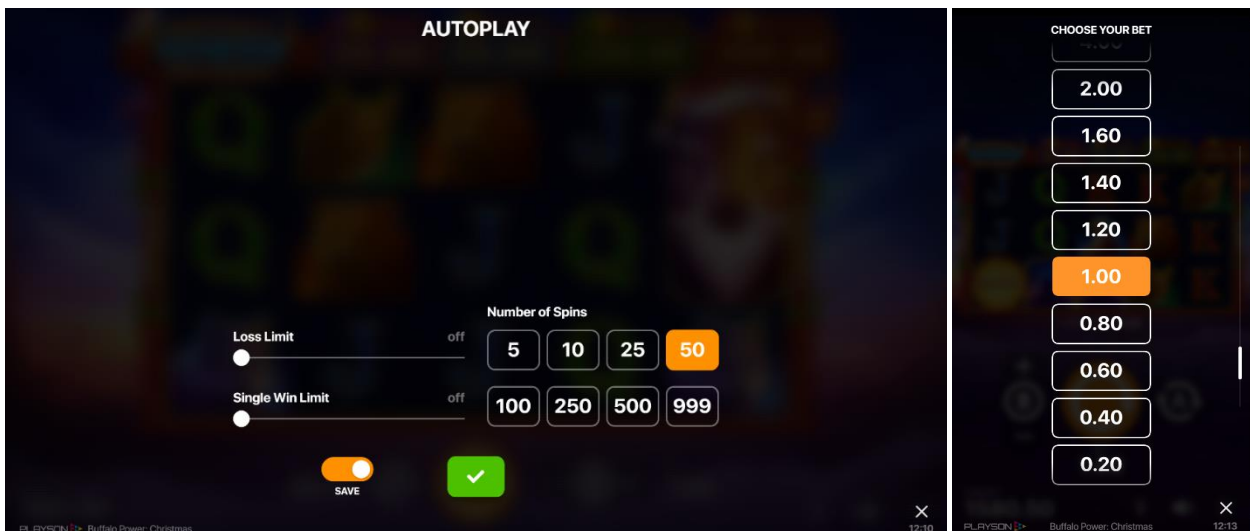

The screen footprint of the game display is 1280x720 pixels and comprises of two main elements – video display area and game panel.

Video display area

The reels are displayed in this area.

When the “Bet Menu” () , “Autoplay settings” () , “Game Menu” () are opened, the video display area is fully replaced. By clicking “X” () button the player can come back to the reel display.

Game panel

The game panel is located at the bottom of the reels for desktop version and for mobile version [portrait]. For the mobile version [landscape] the game panel is located at the right and the bottom side of the reels. It displays the available amount of credits on the player's account as well as bet and winning information.

Mobile version [portrait]

Randomization

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Quantis, physical random number generator exploiting an elementary quantum optics process. Quantis has been evaluated and certified by the Swiss Federal Office of Metrology (also known as METAS), the Swiss national organization in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on <http://www.idquantique.com>.

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format <http://marketing.idquantique.com/acton/attachment/11868/f-0117/1/-/-/-/-/Quantis%20Certifications%20Collection.pdf>.

Quantis has also been approved by national authorities and can be used for gaming applications.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

Information to the Player

Players have access to game rules from within the game at all times.
