Follow the call of ancient shamans where incredible adventures await you! Become one of the first explorers of the mysterious Aztec world, full of countless treasures!

The reels of this bewitching slot are located in dense thickets of vines against the backdrop of an ancient temple's entrance. The sun's rays barely shine through the mighty tree branches, harmoniously complementing the game's enchanting atmosphere. All this, combined with the magical sounds of tom-toms, will make your gaming experience playing Aztec Artefacts slot unforgettable.

The gameplay certainly enhances the bright and colorful design of the slot, which includes elements such as dense jungle with ferns and vines, an ancient, overgrown temple/tomb, stone gates, plundered treasure rooms, ancient artifacts, inscriptions on stones.

There are also free spins, a bonus mode with more free spins, and a mystical symbol that transforms symbols to increase the chances of winning a bigger cluster.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."
