Additional information

HOW TO CALCULATE PAYLINE WINS

- To calculate the total 1024 Ways to Win win, add all the symbol wins together.
- To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the left.
- If the number of consecutive reels containing the symbol is 3 or greater counting from the left, find the corresponding win amount in the dynamic pay table.
- If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example: if the first reel contain 2 symbols, the second reel has 3 symbols and the third reel has 2 symbols, the total multiplier is counted as follows: $2 \times 3 \times 2 = 12$ (total multiplier).
- The above doesn't include any Free Spin symbols which pay scattered.
- All Way Wins are summed together after the spin.

All dates and times are shown in Central European Time (CET).
