HOW TO CALCULATE PAYLINE WINS

To calculate your total payline win, calculate all payline wins and add them together.

To calculate a single payline win, count the number of identical symbols lined up in sequence on the line.

If three or more identical symbols are lined up, find the win value in the fixed Pay Table. There you can find the value for all symbols for 2 in a row, 3 in a row, 4 in a row, and 5 in a row. Only the highest winning combination per line is paid out.

If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.

The above doesn't include the Bonus symbols which do not need to be on a payline to award a prize.

After the Bonus round is completed, all wins are added to any win from the game that activated the Bonus.

There can be a discrepancy between sum of the individual wins in collection Free Spins from what is displayed in the total win end screen. The total win end screen displays the final rounded win.

BOOSTS

Please note that Bonus symbols in the Free Spins bonus games ARE NOT added to the total collected symbols in the top bar.
