<b>RTP (Blackjack)</b>	99.59%
<b>RTP (side bet)</b>	96.98%
<b>External game ID</b>	rgl-rainbowblackjack5

### Game Description

Rainbow Blackjack is a standard Blackjack game with a new and exciting side bet.

35 random cards are 'painted' in rainbow colours before the deal. If the first card dealt is a coloured card, the player wins their side bet multiplied by the value shown! If the first and second cards are both coloured, the win is then multiplied by the first and second card (Orange 7 x 8 Red = x56) If both cards are the same colour, the side bet is multiplied by the set multiplier shown on the cloth (up to x5000!).

Players can also play the side bet without playing the main Blackjack game.

## **Platforms**

The game is available on the following platforms:

- HTML5 Desktop
- HTML5 Phone
- HTML5 Tablet

## **Game views**

The game can be played in different views, as follows:

- The desktop version will scale to most window sizes and will display the appropriate view / layout for that size.
- Both the phone and tablet versions can be played in landscape and portrait view.

## **Number of boxes on mobile**

When in landscape view (and on desktop), 5 boxes are available. In portrait view, 3 boxes are available. This will change when the player rotates their device.

If the player rotates from portrait to landscape mid-game, a message is displayed stating that the current game must be finished before changing view. Once the game is completed, the player will be able to rotate to portrait and continue playing with 3 boxes.

## **Playing the side bet only**

Any cards dealt to a box with a side bet only remain on the table until cleared after the payout sequence. The game of blackjack is not played unless a bet was placed on the Blackjack bet position.

If only side bets are placed (no Blackjack bets) the dealer is not dealt any cards. After all side bets are paid out, the cards are cleared away and the game ends.

## Side bet game details

---

### Rules

To play the side bet, a minimum of one chip must be placed on the side bet box (Rainbow icon above Blackjack box).

The minimum and maximum bet values for the side bet are not necessarily related to those of the Blackjack box.

The player does not have to place a bet on a Blackjack box in order to bet on the side bet. When this happens, no game of Blackjack is played with the two cards dealt to that box.

All side bet payouts are a multiple of the side bet. The side bet itself is not returned.

The coloured cards have no value in the game of Blackjack. As they are already shuffled into the pack, they will still appear during the Blackjack game however.

### Payouts

There are three groups of payouts. Single cards (first card dealt only), Any two cards (not matching) and two cards of the same colour.

Each coloured card awards the value as follows if dealt as the first card:

RED	Bet x8
ORANGE	Bet x7
YELLOW	Bet x6
GREEN	Bet x5
BLUE	Bet x4
INDIGO	Bet x3
VIOLET	Bet x2

## Single coloured card

If the first card dealt is a coloured card, the side bet is multiplied by the card's value in the table above.

For example, if the first card dealt is a green-coloured card, and the second card dealt is a standard white card, the side bet is multiplied by x5.

As the side bet is not returned, the payout for the side bet is therefore x5.

## Two different coloured cards

If both the first and second cards dealt are coloured cards but different in colour, the side bet is multiplied by both card's values in the table above.

For example, if the first card dealt is a green-coloured card, and the second card dealt is an orange-coloured card, the side bet is multiplied by both x5 and x7. (Bet x 5 x 7 = x35).

As the side bet is not returned, the payout for the side bet is therefore x35.

## Two coloured cards of the same colour

If both the first and second cards dealt are the same colour (not white), the side bet is multiplied by the set value shown.

For example, if both cards dealt are red, the side bet is multiplied by x5000.

As the side bet is not returned, the payout for the side bet is therefore x5000.

Payout table for 2 cards of the same colour:

DEALT CARD	DEALT CARD	PRIZE (X SIDE BET)
RED	RED	Bet x5000
ORANGE	ORANGE	Bet x500
YELLOW	YELLOW	Bet x300
GREEN	GREEN	Bet x200
BLUE	BLUE	Bet x160
INDIGO	INDIGO	Bet x120
VIOLET	VIOLET	Bet x80
RED	ORANGE	Bet x56
RED	YELLOW	Bet x48

RED	GREEN	Bet x40
RED	BLUE	Bet x32
RED	INDIGO	Bet x24
RED	VIOLET	Bet x16
ORANGE	YELLOW	Bet x42
ORANGE	GREEN	Bet x35
ORANGE	BLUE	Bet x28
ORANGE	INDIGO	Bet x21
ORANGE	VIOLET	Bet x14
YELLOW	GREEN	Bet x30
YELLOW	BLUE	Bet x24
YELLOW	INDIGO	Bet x18
YELLOW	VIOLET	Bet x12
GREEN	BLUE	Bet x20
GREEN	INDIGO	Bet x15
GREEN	VIOLET	Bet x10
BLUE	INDIGO	Bet x12
BLUE	VIOLET	Bet x8
INDIGO	VIOLET	Bet x6
RED (First)	NONE	Bet x8
ORANGE (First)	NONE	Bet x7
YELLOW (First)	NONE	Bet x6
GREEN (First)	NONE	Bet x5
BLUE (First)	NONE	Bet x4
INDIGO (First)	NONE	Bet x3
VIOLET (First)	NONE	Bet x2

## General Information

---

### Random Game Play

This game is totally random; the odds of getting any particular outcome are always the same and are not based on any other factors or prior outcomes e.g. stake value, previous wins or losses, time of day, account balance, etc.

### Return to Player Percentage

The expected return to player (RTP) reflects the theoretical return over a large number of plays. The RTP is expressed as the percentage returned to players in winnings of the total amount staked, e.g. if £1,000,000 was staked and £960,000 was returned, the RTP of the game for that period of play would be 96%.

The actual RTP during a playing session can vary widely, in either direction, from the theoretical return.

### Game Info and Rules

Game rules and information can be accessed from inside the game in all formats by pressing the Menu button just above the clock at the bottom-right of the game area.
