CRAZY MULTIPLIERS AND MORE BONUS GAMES THAN EVER

Get ready to play the most fun casino game ever made! We have loaded Crazy Time with bonus games and multipliers and created a true game show that's both fun to play and watch. Endless entertainment for your players is guaranteed.

The Crazy Time studio includes a main money wheel, a Top Slot above the money wheel and four exciting bonus games — Cash Hunt, Pachinko, Coin Flip and Crazy Time. The money wheel has 54 segments, and each contains either a number (1, 2, 5 or 10) or a bonus game.

At the start of each game round, both the money wheel and the Top Slot will spin at the same time. The Top Slot will determine one random multiplier for one random bet spot — either a number or bonus game. When a multiplier and bet spot align horizontally in

the Top Slot, it's a match and a multiplier will be added to this bet spot.

When the money wheel comes to a stop, the winning segment is indicated by the flapper at the top of the wheel. If the wheel stops at the number that you have placed your bet on, you win. Your winnings are multiplied if the Top Slot multiplier was assigned to this particular bet spot. If the wheel stops at a bonus game segment, the bonus game will start. If a Top Slot multiplier was won for this segment, the multipliers in the bonus game will be multiplied with the Top Slot multiplier.

CrazyTime is loaded with bonus games and excitement but remember to place a bet on the bonus game to take part in the bonus round!

KEY BENEFITS

- Built on the successful Dream Catcher concept
- Top Slot generates multipliers for bet spots
- Four exciting bonus games
- Fun and exciting studio.

HOW TO PLAY

PLACE BETS

- Place your bets on the bet spots where you think that the money wheel will stop
- When the betting time is over, the game presenter will spin the money wheel
- The Top Slot generates one random multiplier for one random bet spot — either a number or a bonus game
- If the bet spot and multiplier do not align horizontally in the Top Slot, the game will proceed without a multiplier.

MONEY WHEEL

- When the money wheel comes to a stop, the flapper will show which segment on the wheel won
- If the wheel stops at the number you have placed your bet on, you win
- If the number was given a random multiplier from the Top Slot, your bet will be multiplied accordingly
- If the wheel stops on a bonus bet spot the bonus game will start
- If the bonus game received a random multiplier, the multipliers in the bonus game will be multiplied with this multiplier at the start of the bonus round
- All players can observe the bonus games but only players who have placed a bet on the corresponding bet spot can participate and win.

CASH HUNT

Cash Hunt is a shooting gallery and features a big screen with 108 random multipliers.

- The multipliers are covered by random symbols and then shuffled
- You select your own target, i.e. the symbol you believe is hiding the largest multiplier
- When the countdown begins, position your aim at your chosen symbol on the screen
- The cannon will shoot at the target when the time is up and reveal the hidden multiplier
- The multiplier you won will multiply your bet

Each player will select their own target in this interactive bonus round. As a result, players will win different multipliers.

PACHINKO

The Pachinko bonus game features a large Pachinko wall with a multitude of physical pegs with 16 drop zones at the top and 16 random multipliers in the landing zones at the bottom.

- All landing zones are given a random multiplier or a 'DOUBLE' value
- The puck is dropped randomly from zones 4-12
- The puck travels down the wall to finally land in a landing zone
- If the puck lands on a multiplier, your bet will be multiplied
- If the puck lands on 'DOUBLE', all the multipliers are doubled. A new drop zone is randomly chosen, and the puck is dropped again until it lands on a doubled multiplier or until the multipliers have reached the maximum 10,000x multiplier
- Occasionally a Rescue Drop might occur if the puck landed on a 2x, 3x or 4x multiplier. Any multiplier that is lower than the won multiplier will be boosted to the won multiplier's value. A new drop zone is randomised and the puck is dropped again.

COIN FLIP

Red or blue — let the coin decide! In the Coin Flip bonus game, a coin with a blue side and a red side will be flipped.

- The coin is placed in the coin launcher
- The multiplier values for each side are then revealed
- The game presenter will push the Flip button and the coin is automatically flipped
- The side that is facing up at the end wins. If the coin lands with the red side up, you will win the red multiplier and vice versa for the blue side
- Occasionally a surprise Rescue Flip might occur where the coin is flipped again if the assigned multipliers are low.

CRAZY TIME

Behind the red door there’s a gigantic virtual wheel in a crazy and fun virtual world. The virtual wheel has 64 segments and three flappers. It is filled with crazy multipliers with the possibility for crazy multiplied winnings!

Crazy Time has four different virtual wheels, some offer more 'DOUBLE' and 'TRIPLE' segments, some offer higher multipliers — all to make the game even more exciting! The wheel is randomly selected at the start of the bonus round.

- Choose your flapper: green, blue or yellow
- If the decision time runs out, a random flapper is automatically selected
- The game presenter starts the wheel by pushing the button
- When the wheel stops spinning, the flappers will be pointing at three different segments. You will win the multiplier at your chosen flapper. The multiplier will be applied to each player’s winnings instantly
- If a flappers stops at “DOUBLE’ or ‘TRIPLE’, all the multipliers on the wheel will be doubled or tripled. If you chose this flapper, you will take part in a re-spin with the chance to win even bigger multipliers!
- The wheel can be re-spun after winning on ‘DOUBLE’ or ‘TRIPLE’ until the multipliers have reached the maximum 20,000x multiplier.
