### ABOUT THE GAME

Elysian Jackpots is a Video Slot with 5 reels and 20 paylines oriented from left to right. The game has eight regular symbols that pay if three or more are lined up in sequence on a payline, beginning from the leftmost position. There is a Scatter symbol that activates the Shield if 3 or more appear anywhere on the reels. There are also 5 Key symbols that award Jackpot Free Spins and 5 Gem symbols that award 1 of 5 Jackpots.

### THE SCATTER SYMBOL

## KEY COLLECTION

There are 5 different Keys to collect: Blue, Violet, Green, Orange, and Red. Each Key only appears on its own reel. When a collection is filled (5 identical Keys are collected) players are awarded 10 Jackpot Free Spins with 1 starting gem towards that reel's Jackpot collection. The awarded Free Spins are played with the average bet of all bets used when collecting the Keys. All new players receive 2 Blue Keys and 1 of each other Keys to start their Key collection. Keys can also be collected in the Treasure Vase Bonus game and the Pick & Click Chest game. All collected Keys are saved between game sessions. If several Key collections are completed in the same spin, then Jackpot Free Spin modes are played out in sequence starting from the lowest value.

## JACKPOT FREE SPINS

All line wins in Jackpot Free Spins receive an x3 multiplier

There are no Scatter or Key symbols

There are 5 different Gems that award a Jackpot when 5 Gems of the same color are collected in a single Free Spin session

Gem collections are reset at the end of each Free Spin Session

Jackpot Free Spins are played with the same lines as in the base game

## THE JACKPOTS

Collecting 5 Gems of the same color awards the corresponding Jackpot.  
Gems appear in all Free Spin modes and are not saved between Free Spin sessions.  
Free Spin multipliers do not apply to Jackpot wins.

## **JACKPOT RULES**

All Jackpots are progressive. 3.8% of each bet is contributed to the Jackpots.  
None of the Jackpots have a ceiling value, meaning: they do not have a limit before they pay out.  
Jackpot Wins are subject to verification by the operator and the supplier. All decisions are final and no correspondence will be entertained.  
The Jackpot values are displayed at the top as recorded on the supplier's server. Every effort is made to ensure that the progressive Jackpot values displayed in the game are the same as the ones on the supplier's server.  
Jackpots cannot be won when Playing For Fun.  
The probability to win the Jackpot in each spin is proportional to the player's bet size.  
All 5 Jackpots can be won in a single Jackpot Free Spins round.  
No simultaneous Jackpot win by two or more players is possible for the same Jackpot; when one game round makes a claim for a certain Jackpot, it is simultaneously assured that no other game round can claim the same Jackpot. In the event of two players seeming to have won at the same time, due to network latency or other reasons one will always be first.

The 3.8% contribution to current jackpots is split in the following way:

Blue Jackpot – 0.7%  
Violet Jackpot – 0.7%  
Green Jackpot – 0.6%  
Orange Jackpot – 0.6%  
Red Jackpot – 1.2%

The start values for the jackpots are always:

Blue Jackpot – €40  
Violet Jackpot – €200  
Green Jackpot – €600  
Orange Jackpot – €1500  
Red Jackpot – €15 000

Or the equivalent in your chosen currency.

## **HOW TO PLAY**

Press the Spin button to start the game.

## **HOW TO CALCULATE PAYLINES**

To calculate your total payline win, calculate all payline wins and add them together.

To calculate a single payline win, count the number of identical symbols lined up in sequence on

the line starting from the far left.

If three or more identical symbols lined up, find the payout in the Pay Table. There you can for all symbols find the value for 3 in a row, 4 in a row, and 5 in a row. Only the highest winning combination per line is paid out.

The above doesn't include any Scatter symbols which pay scattered.
