

Starwins

Look up to the night sky and try to read in the stars to get a glimpse of the future winnings that await you in this dreamy slot.

About the game

Astraea, the daughter of the god of dusk and goddess of dawn will guide the players through this slot. She used to live on Earth in ancient times but when misery and wickedness took over, she abandoned it. Ever since then, she dwells on the night sky and spends her days chasing falling stars and sweeping the stardust of the constellations to let them shine brighter.

Among the symbols spinning on the reels, you will find card values from 10 to Ace, each connected with a star sign, the rest of the symbols are objects associated with astrology.

Game mechanics

This slot features a “**Wild**” symbol: a question mark that can replace any other symbol and increase your chances of winning. If you’ve hit upon a winning combination, the “**x2**” symbol can appear on any of the reels. This symbol is your ticket to a bonus multiplication game, the aim of which is as follows. At the start of each round, you need to choose a card with a picture of the character you want to back, after which two cards duke it out.

Your winnings will increase exponentially with each victory and the multiplier can potentially hit the golden heights of x32. However, if the card you choose loses, this will spell the end of your bonus game. What’s more, you can collect your winnings at any time.
