HOW TO CALCULATE WINS WITH “WIN ALL WAYS”

To calculate your total WIN ALL WAYS win, add all your symbol wins together

To calculate a single symbol win, count the number of subsequent reels that contain the symbol, starting from the left or the right

If the number of subsequent reels containing the symbol is three or greater counting from the left, find the

GAME RULES

corresponding win amount in the paytable, otherwise, if the symbol was not present on three subsequent reels counting from the left, count from the right

If the number of subsequent reels containing the symbol is three or greater counting from the right, find the corresponding win amount in the paytable

If any of the reels contain more than 1 instance of the winning symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example, if the first reel contains 2 symbols, the second reel 3 symbols, and the third reel 2 symbols, the paytable value is multiplied in the following manner: $2*3*2=12$ (total multiplier)

5 of a kind wins only pay from one side

During gameplay, different way wins are added together

GAME RULES
