GAME OVERVIEW: CHICKEN DROP™

Egg Feature

During tumbling there is a chance that in the desolated spaces a Size upgrade and/or a Mult upgrade can land.

The Mult upgrade symbol is only able to be landed once the first Size upgrade has landed. Note that this can happen in the same cascade.

Size upgrades will start from 2x2 and grow by 1 height and width with every upgrade. Max of 6x6.

Mult upgrades will start from 1x and go up to 10x.

The game collects all the upgrades and save them then tumbles the upgrades away. This will trigger another tumbling and more possible upgrades.

Once there are no upgrades on screen or clustered symbols the Egg will come into the game if there has been a size upgrade. A square with size collected appears on window (located randomly) with replacing all the symbols in the square by a single random regular symbol.

Once on screen it will pay as a regular cluster of symbols and have the multiplier applied to any wins. It can link up with other symbols on screen.

The game will tumble and can land extra upgrades. Every time a new upgrade lands, the egg will appear again and the cycle will continue.
