# Game features

## Golden Gaze

Winning symbols are turned sticky and a respin of other symbols is triggered. Respins retrigger as long as new winning symbols land or the board is filled with winning symbols.

## Multipliers

Filling columns with winning symbols awards a multiplier. The multiplier is equal to the number of columns filled and per the indicator below the reels. This will usually happen over the course of Golden Gaze respins.

# Game rules

Welcome to Golden Gorgon Video Slot with the Golden Gaze and Column multiplier features.

## **ABOUT THE GAME**

Golden Gorgon is a Video Slot with 5 reels, 3 rows and 25 paylines. The game has seven regular symbols that win if three or more are lined up on a payline beginning from the leftmost reel.

## **GOLDEN GAZE**

Land any winning line to trigger a respin with all winning symbols locked in their position. If any new symbols of the same type appear in the respin, they will also be locked and another respin will be awarded. The win is payed out only after no new winning symbols appear. If a different winning symbol lands on a payline during a respin, that symbol is not held but instead payed out in that respin. Respins are played with the same bet and lines as the triggering spin.

## **COLUMN MULTIPLIER**

If all symbols in two or more left-most columns are the same, the final prize of those symbols is multiplied. The multiplier is equal to the number of consecutive filled columns from the left (x2 up to x5).

## HOW TO PLAY

Press the Spin button to start game.

## HOW TO CALCULATE PAYLINE WINS

- To calculate your total payline coin win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.
- If three or more identical symbols are lined up, find the coin win value in the dynamic Pay Table. There you can find the value for all symbols for 3 in a row, 4 in a row, and 5 in a row.
- Only the highest winning combination per line is paid out.
- The above doesn't include Free Spin symbols which do not need to be on a payline to award a prize.
- If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- Calculate the total win in your home currency by multiplying the total coin win with your coin value.

## RETURN TO PLAYER

The overall theoretical return to player is 96.0%

## **RANDOMIZATION**

The reels are spun with a fair and equal chance for each stop position by a certified random number generator. For more information, visit <http://www.yggdrasilgaming.com/en/about-us>
