Game Theme and Graphics

While gliding on the high-altitude player will see not only the surrounding beauty of wild nature but also its most interesting inhabitants: lynx, owl, boar and mountain goat. All of them alongside the main character, bald eagle, are the main symbols of this slot. The latter acts like Wild symbol that occasionally transforms into Striking Wild during Free Spins mode. The features activators are Power golden coin symbol, Bonus lightning-ball symbol and Scatter symbol.

Adventure unfolds in the clear sunny sky where the bald eagle hunts for its prey. This background was intentionally made free of details in order to keep the attention in the center of the screen. Music follows the same logic and was designed with relaxation in mind, however, it gets trickier and louder during activated features and big wins.
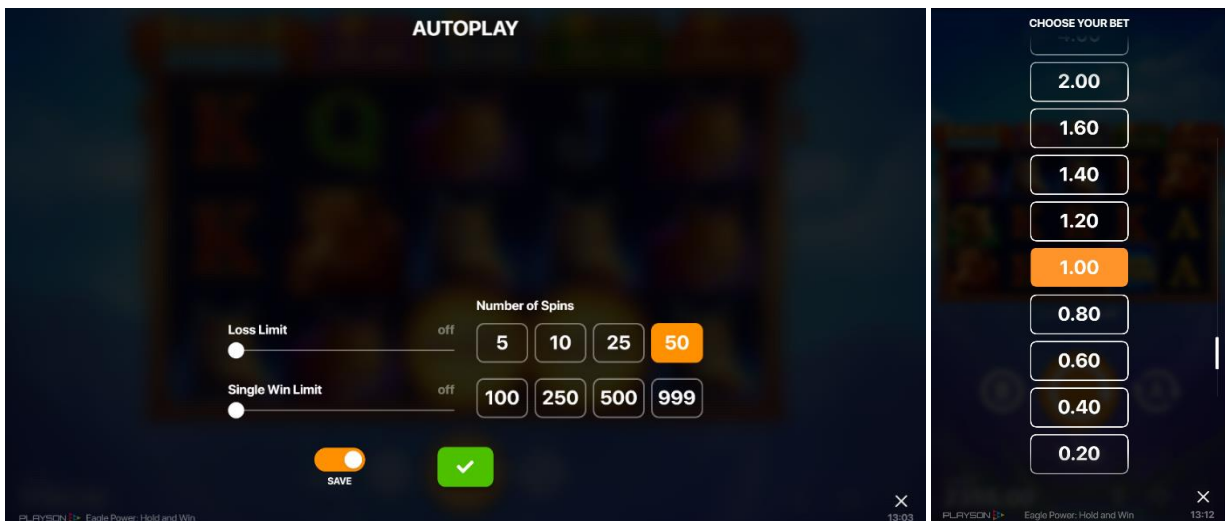

Game screen

The screen footprint of the game display is 1280x720 pixels and comprises of two main elements – video display area and game panel.

Video display area

The reels are displayed in this area.
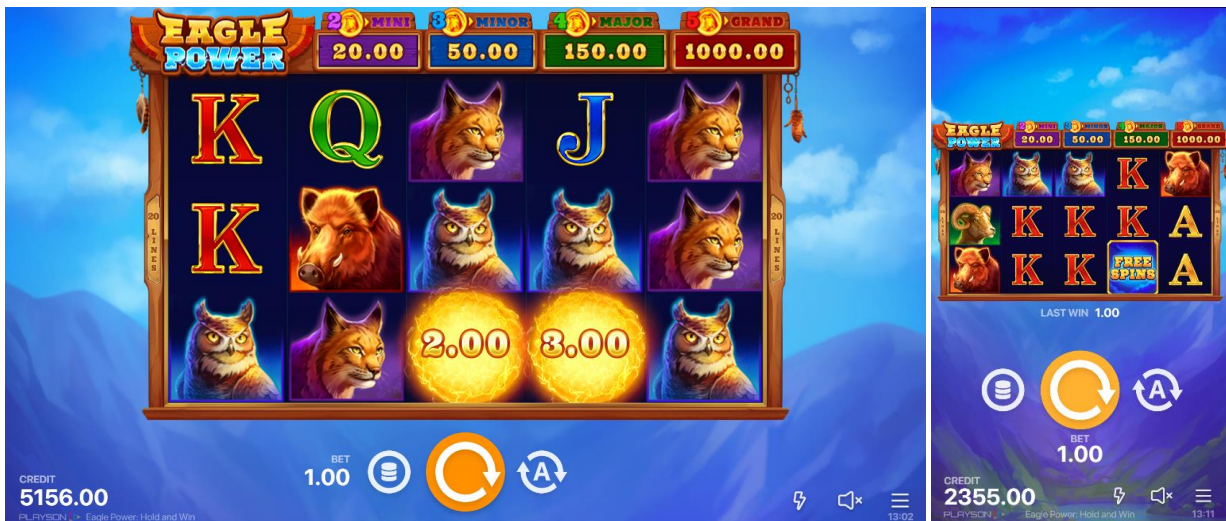

When the "Bet Menu" (⊙), "Autoplay settings" (Ⓐ), "Game Menu" (≡) are opened, the video display area is fully replaced. By clicking "X" (✕) button the player can come back to the reel display.

Game panel

The game panel is located at the bottom of the reels for desktop version and for mobile version [portrait]. For the mobile version [landscape] the game panel is located at the right and the bottom side of the reels. It displays the available amount of credits on the player's account as well as bet and winning information.

Randomization

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Quantis, physical random number generator exploiting an elementary quantum optics process. Quantis has been evaluated and certified by the Swiss Federal Office of Metrology (also known as METAS), the Swiss national organization in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on http://www.idquantique.com.

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format http://marketing.idquantique.com/acton/attachment/11868/f-0117/1/-/-/-/-/Quantis%20Certifications%20Collection.pdf.

Quantis has also been approved by national authorities and can be used for gaming applications.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

Information to the Player

Players have access to game rules from within the game at all times.
