Our favorite leprechaun is back! Lucky Leprechaun Clusters is a lively and fun-filled brand extension of Lucky Leprechaun, the popular Irish-themed slot released by MGS in 2015. While the superb artwork and audio remains true to the original, this new game centers around the innovative ClusterChase™ mechanic. Players get to unlock special features and trigger the Trail O’ Fortune Bonus, and stand a chance to win up to 4600x in this feature-packed high volatility game.

Lucky Leprechaun Clusters plays out on a 7x7 grid, where 5 or more matching adjacent symbols form a winning cluster. The inclusion of the familiar Rolling Reels™ mechanic means that winning symbols are removed from the grid, and new symbols fall into place from above - potentially triggering multiple wins from just one spin.

All winning symbols from a single roll are collected and counted in the beer-themed Feature Meter. The Feature Meter has 5 levels. The goal is to collect enough winning symbols to complete all 5 levels - and bag some impressive cash prizes along the way!

The first 4 levels are reached by collecting 21, 42, 63, or 84 symbols. As the player unlocks a level, 1 of 4 fantastic features is randomly awarded: Shamrock Shake, Pots O’ Gold, Lucky Coin, Rainbow Road.

The contents of this document are strictly confidential. All information is correct at time of release, and is subject to change at the discretion of Microgaming.

Collecting 125 or more winning symbols will advance players to the 5th and final level, the Trail O' Fortune Bonus. Players are awarded 4 spins of the Bonus Wheel and a chance to win up to 1500x on the Multiplier Trail. Spinning the wheel reveals how many steps the player will take along the Trail. Landing on a Rainbow Bridge will allow players to jump ahead to a higher multiplier win, while a hidden Emerald will award an extra spin.

And just for good measure, Clovers and Lucky Charms are 2 additional features that could potentially trigger on every single spin!

Lucky Leprechaun Clusters is a polished and highly engaging portrait premium game that will appeal to seasoned fans of ClusterChase™ games, as well as those looking for a refreshing alternative to traditional 5-reel slots.

The great win potential, generous features, and the pairing of a collection meter with the ClusterChase™ mechanic will keep players engaged and invested in this fresh take on a classic theme!

CLUSTER RULES

Clusters of 5 or more of the same symbol type constitute a winning cluster combination.

Symbols must be adjacent horizontally or vertically to form a cluster.

Clusters can exist anywhere on the grid.

Cluster wins are multiplied by the Coins bet.

WILD RULES

The 3 Wild symbols will substitute for all high and low symbols

Different Wild symbols can be included in the same cluster.

BASE GAMES RULES

All winning symbols that are involved in cluster wins are removed from the grid after the wins are awarded, and new symbols fall down into the grid (this is a rolling reels game).

There is no limit to the number of rolls that can occur.

Every winning symbol contributes to the Feature Meter.

- Accumulating symbols in the Feature Meter unlocks reel features.
- Each feature requires 21 symbols to be collected for it to be unlocked.
- Every spin, the order in which the 4 reel features (Pots 'o Gold, Rainbow Road, Lucky Coin & Shamrock Shake) are awarded is randomized and displayed on the feature meter.

CLOVERS RULES

Every spin, one of the 4 low symbols (Ace, King, Queen or Jack) are selected to have Clovers attached to them.

If the selected low symbol is involved in a winning cluster, at least one Clover Wild will be left behind in position of the involved symbols.

LUCKY CHARMS RULES

Every non-winning spin, there is a chance that the Lucky Charms feature could occur.

When the Lucky Charms feature occurs, one of the 4 low symbols (Ace, King, Queen or Jack) is selected to be duplicated on the screen.

Each of the selected symbols on the screen will duplicate itself in any direction, so long as the symbol in that direction is of a different type.

- It is possible that some of these selected symbols will not duplicate due to being surrounded by other symbols of the same type.

POTS O' GOLD RULES

The Pots o' Gold feature is unlocked through the feature meter.

When the feature occurs, between 2 and 6 Wild Pots are added to the screen.

- The symbols to the left, right, above left, above right and above the new wild symbol are removed so that new symbols may fall into the grid.
- Existing Wild symbols will not be removed during this feature.

RAINBOW ROAD RULES

The Rainbow Road feature is unlocked through the feature meter.

When the feature occurs, a Wild Pot is added to the grid in a random position.

- All the symbols to the left, right, above and below this Wild Pot are removed from the grid
- Between 0 and 4 additional wilds are added to the grid in random positions along the above 'Road' where the old symbols were removed from.
- Existing Wild symbols will not be removed during this feature.

LUCKY COINS RULES

The Lucky Coin feature is unlocked through the feature meter.

When the feature occurs, any of the high or low symbols OR the Wild Coin is selected to be added to the screen in random positions.

- Between 10 and 15 of these symbols are added to the screen in random positions.
- Existing Wild symbols will not be removed during this feature.

SHAMROCK SHAKE RULES

The Shamrock Shake feature is unlocked through the feature meter.

When the feature occurs, 4 of the high and low symbols (4 in total) are selected to be removed from the grid. A random multiplier of between 1 and 3 is selected for the feature. If the selected multiplier is 2 or 3 we will show the multiplier in the game. The multiplier will remain active until the next feature ensues.

- Each symbol type is removed one at a time.
- When all 4 of the symbol types have been removed from the grid a multiplier may be shown to the player, then the reels will roll.

TRAIL O' FORTUNE BONUS GAME RULES

The Trail o' Fortune bonus game is unlocked once the user has accumulated at least 125 winning symbols.

To play the bonus game, the player must press the spin button to spin the wheel. The player will be given 4 spins at the beginning of the feature.

The player's position on the trail will advance by the number of steps indicated on the wheel.

If the player lands on a position with a rainbow above it, the player will cross the rainbow and land on the connected position above.

The player can be granted an additional turn if they land on a secret position that reveals an 'extra spin'.

The maximum multiplier that the player can win in the bonus is 1500x - the multiplier is multiplied by the player's bet.
