

Game Description

Not all pirates sail the high seas! Some prefer to stick to the shallows. Plunge into the colorful world of the Reef Raider and find out what he's up to inside his rock pool.

Reef Raider™ is a 7x7 cluster pays mechanic slot, feature-packed and bursting with fun. Five or more adjacent symbols of the same type award a cluster win. Cluster wins trigger the Avalanche™ feature. Reels are encircled by a 'Treasure Trail' consisting of 15 'meter bars'. These bars are initially uncharged, but each time a Clam Wild is removed from the play area because of a cluster win, 1 bar of the Treasure Trail meter is charged. The Reef Raider -- a crazy pirate crustacean searching for treasure -- moves along the treasure trail as its meter bars get charged. Features lie at each of the four points along the Treasure Trail and are activated when the Reef Raider arrives at that point along the track. Features include the Anchor Drop Feature, Random Wilds Feature, Mystery Chest Feature, and the Canon Blast Feature. 15 or more charged Treasure Trail meter bars triggers Free Spins.

Fancy yourself a pirate? Let the Reef Raider take you under his claw. NetEnt studios are all set to let loose the most fearsome crustacean that ever roamed the ocean (floor). Prepare to join up with the coolest crab this side of Tortuga in Reef Raider™.
