Players venture into the dark dragon's den and team up with trolls to plunder the loot.

Trolls stick together, when a stack of matching symbols lands in the first reel, the symbols, along with any other matching ones, lock-in and re-spins begin until no further matches are made. Don't underestimate these tiny trolls, they bring gigantic win potential, adding a multiplier to the total win, ranging from 2x to 10x!

When a stack of Gold Bag symbols drop on reel 1, Treasure Trove Re-spins are awarded, bringing win potential big enough to make tycoons out of these trolls. Only two symbols can land in this round, the Gold Bag symbol with multipliers attached, and the Treasure Chest Collector symbol that gathers all the values of all symbols present at the time of landing and adds them up on the collection metre. Filling up all 19 spaces in the meter awards the top collection prize that can see your players score a whopping 10,000x bet!

Do they dare to step inside the dragon's den?
