# Game rules

10x Rewind is a 6-reel, 4,096 Ways slot created by 4ThePlayer.com. Ways slots remove paylines to make it easier to see the wins. A win is formed from consecutive symbols starting from the first reel.

10x Rewind features the Rewind Time Win Spins bonus: go back in time and reencounter your past wins, which are boosted with increasing win multipliers, extra cash prizes and win spin retriggers. The game also features 4ThePlayer's unique BIG REEL Portrait Mode™.

## How to play?

The player chooses their bet amount using the + and – buttons. All wins are multiplied by the bet. For details on win payouts see the game payable.

To play the game, the player presses the SPIN BUTTON. If playing on PC and if enabled in the game options menu, the space bar can also be used to spin the reels.

Winning symbols are raised over the reels when the spin stops.

Wins pay from left to right. In the BIG REEL Portrait Mode™, wins pay from top to bottom.

## **BIG REEL Portrait Mode™**

When playing on mobile in portrait, the player has the option of playing classic small reels or BIG REEL Portrait Mode™. This option enlarges the reels, stacks them on top of each other and spins them right to left and pays top to bottom. This maximises the visual experience on the mobile without changing the game experience.

This mode is only available in portrait mobile play. Payouts and game features are unchanged.

## **Win spins Scatter**

3 Win Spins Scatters will trigger the Rewind Time Win Spins bonus. Win Spins Scatters can appear on reels 1, 3, and 6.

## **Wild**

The Wild symbol substitutes for every symbol apart from scatters.

## **Rewind Time win Spin Bonus**

3 Win Spins Scatters will trigger the Rewind Time Win Spins bonus. Pick 1 of the triggering scatters to win 5, 7, or 10 Win Spins.

The bet for the Win Spins bonus will be set at the value that the Win Spins bonus was triggered.

The player's previous spins will be played out in reverse order, beginning with the most recent previous spin. Only winning spins will count against the player's total number of Win Spins. Wins will be re-awarded to the player, multiplied by the current win multiplier.

Spins where 1 or more Scatters land on the reels count as winning spins. Each Scatter can award 1 of the following:

- Increase to the win multiplier.
- A cash prize.
- Additional Win Spins.

Previous wins will be taken from previous spins at the triggering bet level.

When this feature is awarded, where previous spins do not exist at the triggering bet level, random spins will be generated.

The game will store 187 previous spins per bet level.

## **How to calculate a win with 4,096 ways**

If any of the reels contain more than 1 instance of a symbol, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final payout multiplier. For example, if the first reel contains 2 symbols, second reel 3 symbols and third reel 2 symbols, the payable value is multiplied by  $2 \times 3 \times 2 = 12$ .

## **Autoplay**

Autoplay allows the player to play without pressing spin. To open Autoplay, press the AUTOPLAY button (the small button with 4 arrows and a play icon in the middle).

The player can choose the number of spins, loss limit, and single win limit. The spins will automatically stop when the chosen number is reached or when the loss limit or single win limit is hit.
