MARKETING ASSETS

Lightning Ball is a unique addition to our award-winning Lightning family. It adds an electrifying twist to the traditional ball-drawing game, ensuring fast-paced game rounds featuring multipliers and a dramatic live casino experience.

Lightning Ball takes the famous ball-drawing game concept to the next level with two ball-drawing machines, a Lightning multiplier, and an electrifying ambiance.

Boost your winning potential by purchasing up to 200 tickets per game, and the chance of seeing

your winnings skyrocket with the power of the Lightning multiplier!

Each game features a Lightning multiplier ranging from 2x to 50x, unlocking the possibility of multiplied payouts.

Six balls are drawn in each game round – five balls from the first drum and one Powerball from the second drum. The Powerball boosts your chance of drawing numbers 1-10 and getting more numbers matched, giving you the opportunity to receive increased payouts.

KEY BENEFITS

- Guaranteed Lightning multiplier in each game round
- Increased chances of matched numbers due to the draw of the Powerball
- Only two matched numbers required for a win.

HOW TO PLAY

The aim of Lightning Ball is to match as many numbers as possible on a single ticket.

Lightning Ball is played with two ball-drawing machines. The main drum contains 30 balls (from 1 to 30), and the second Powerball drum contains 10 balls (from 1 to 10).

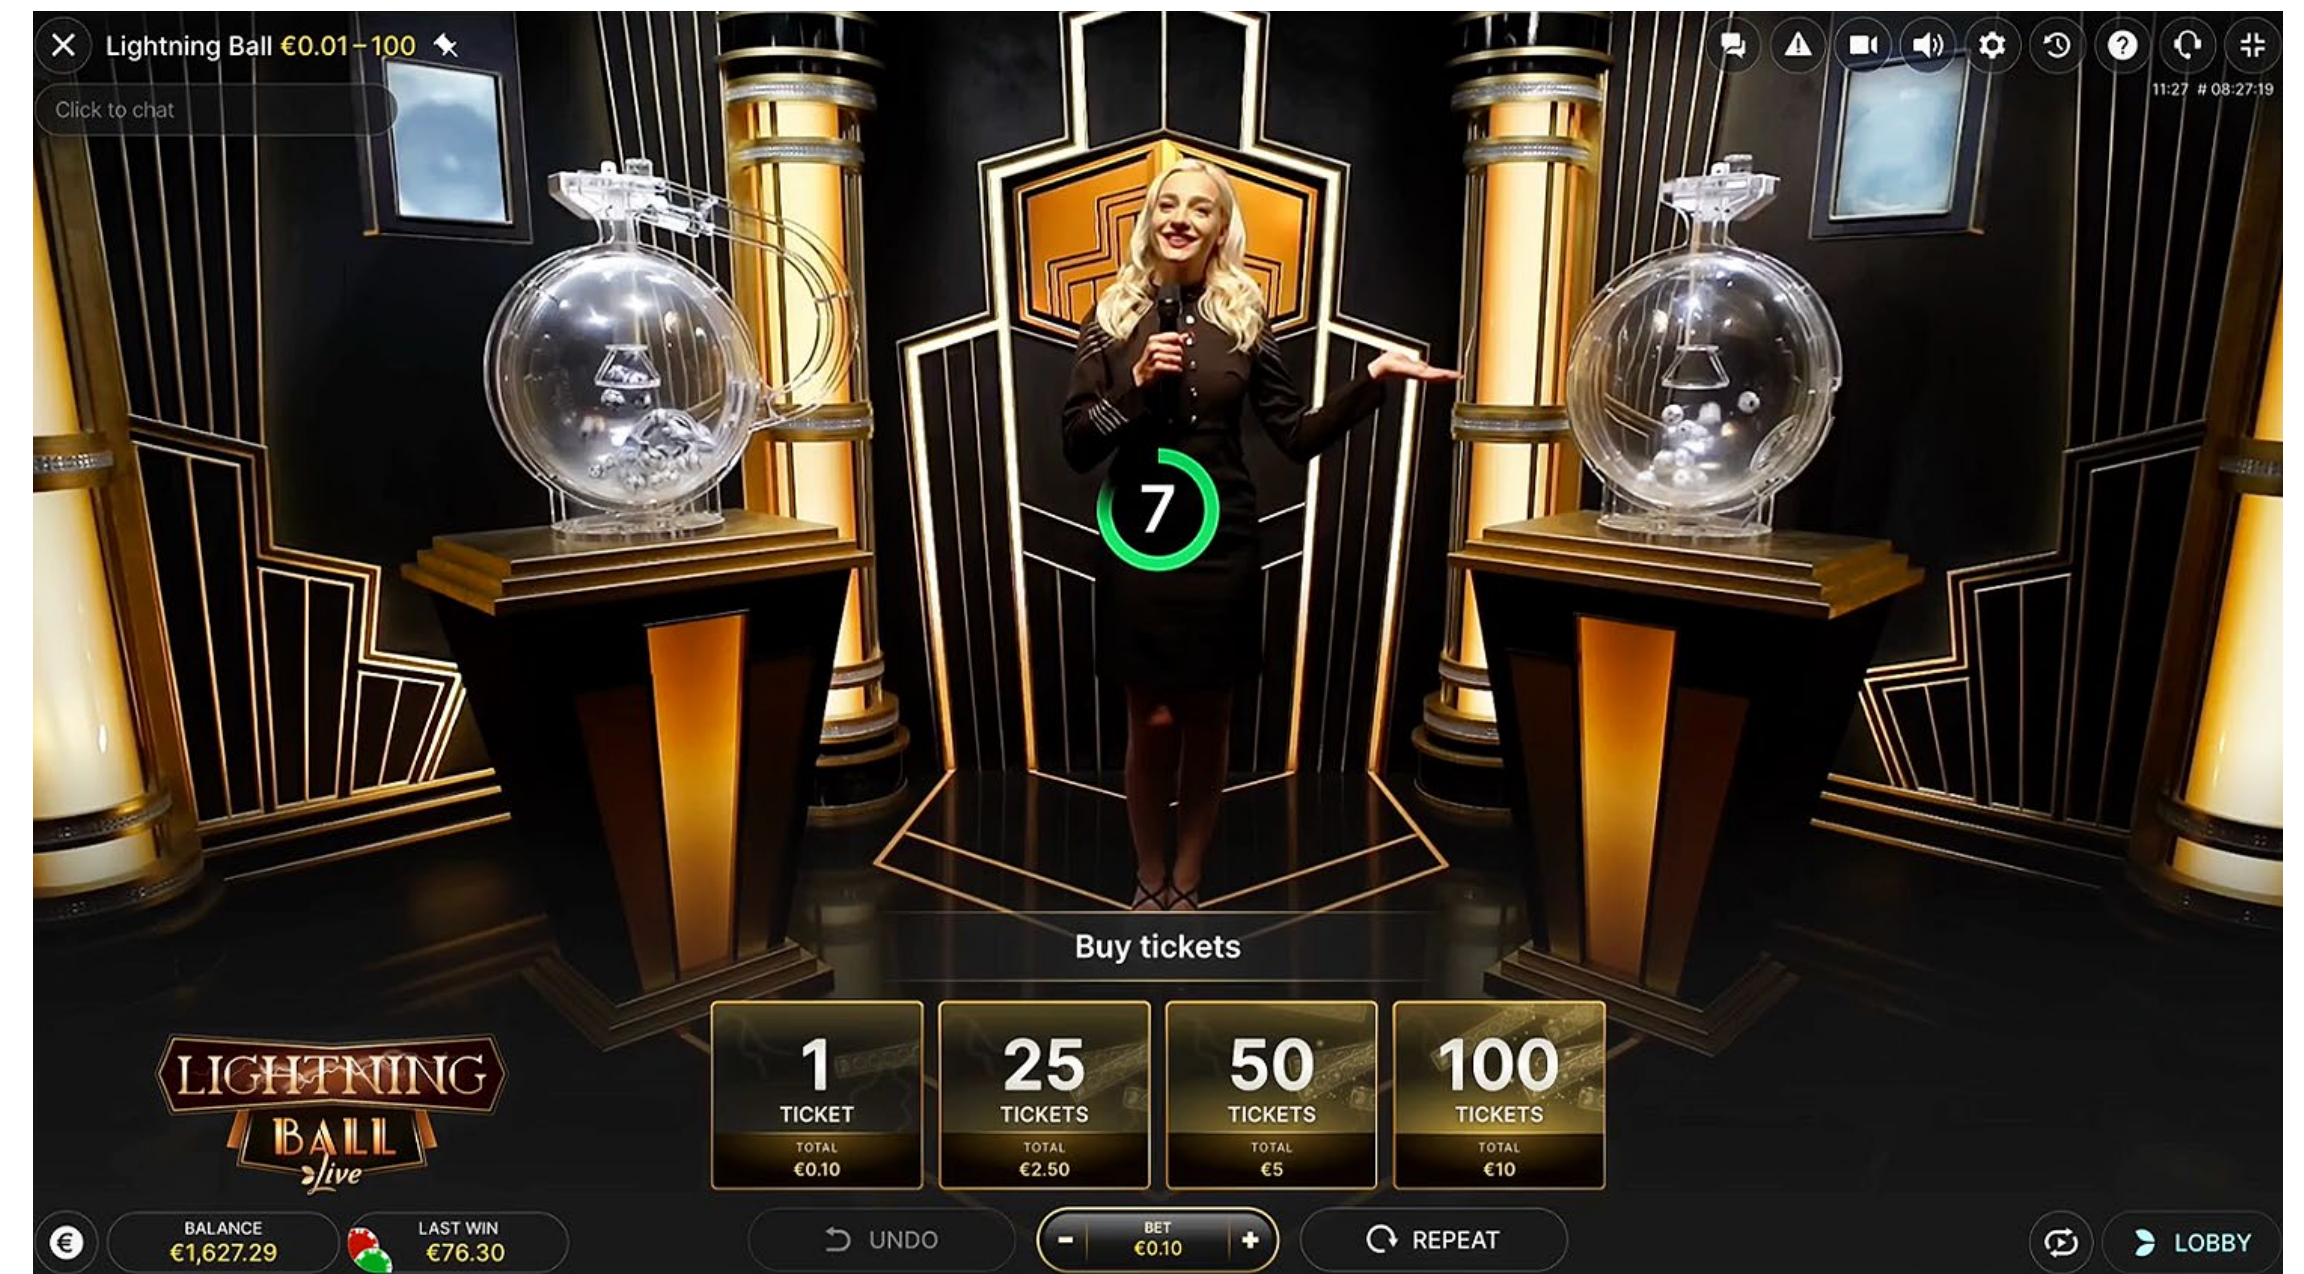

To win, you must match at least two numbers on your ticket (including the Powerball number).

PURCHASING TICKETS

Decide how many tickets you wish to buy and select the value for each ticket. To buy several tickets, four buttons allow you to purchase 1, 25, 50 or 100 tickets with one click.

You can buy up to 200 tickets per round.

Each ticket contains five standard numbers between 1 and 30 and a Powerball number between 1 and 10.

GAMEPLAY

After the betting time is closed, the main ball-drawing machine draws five numbered balls from a pool of 30.

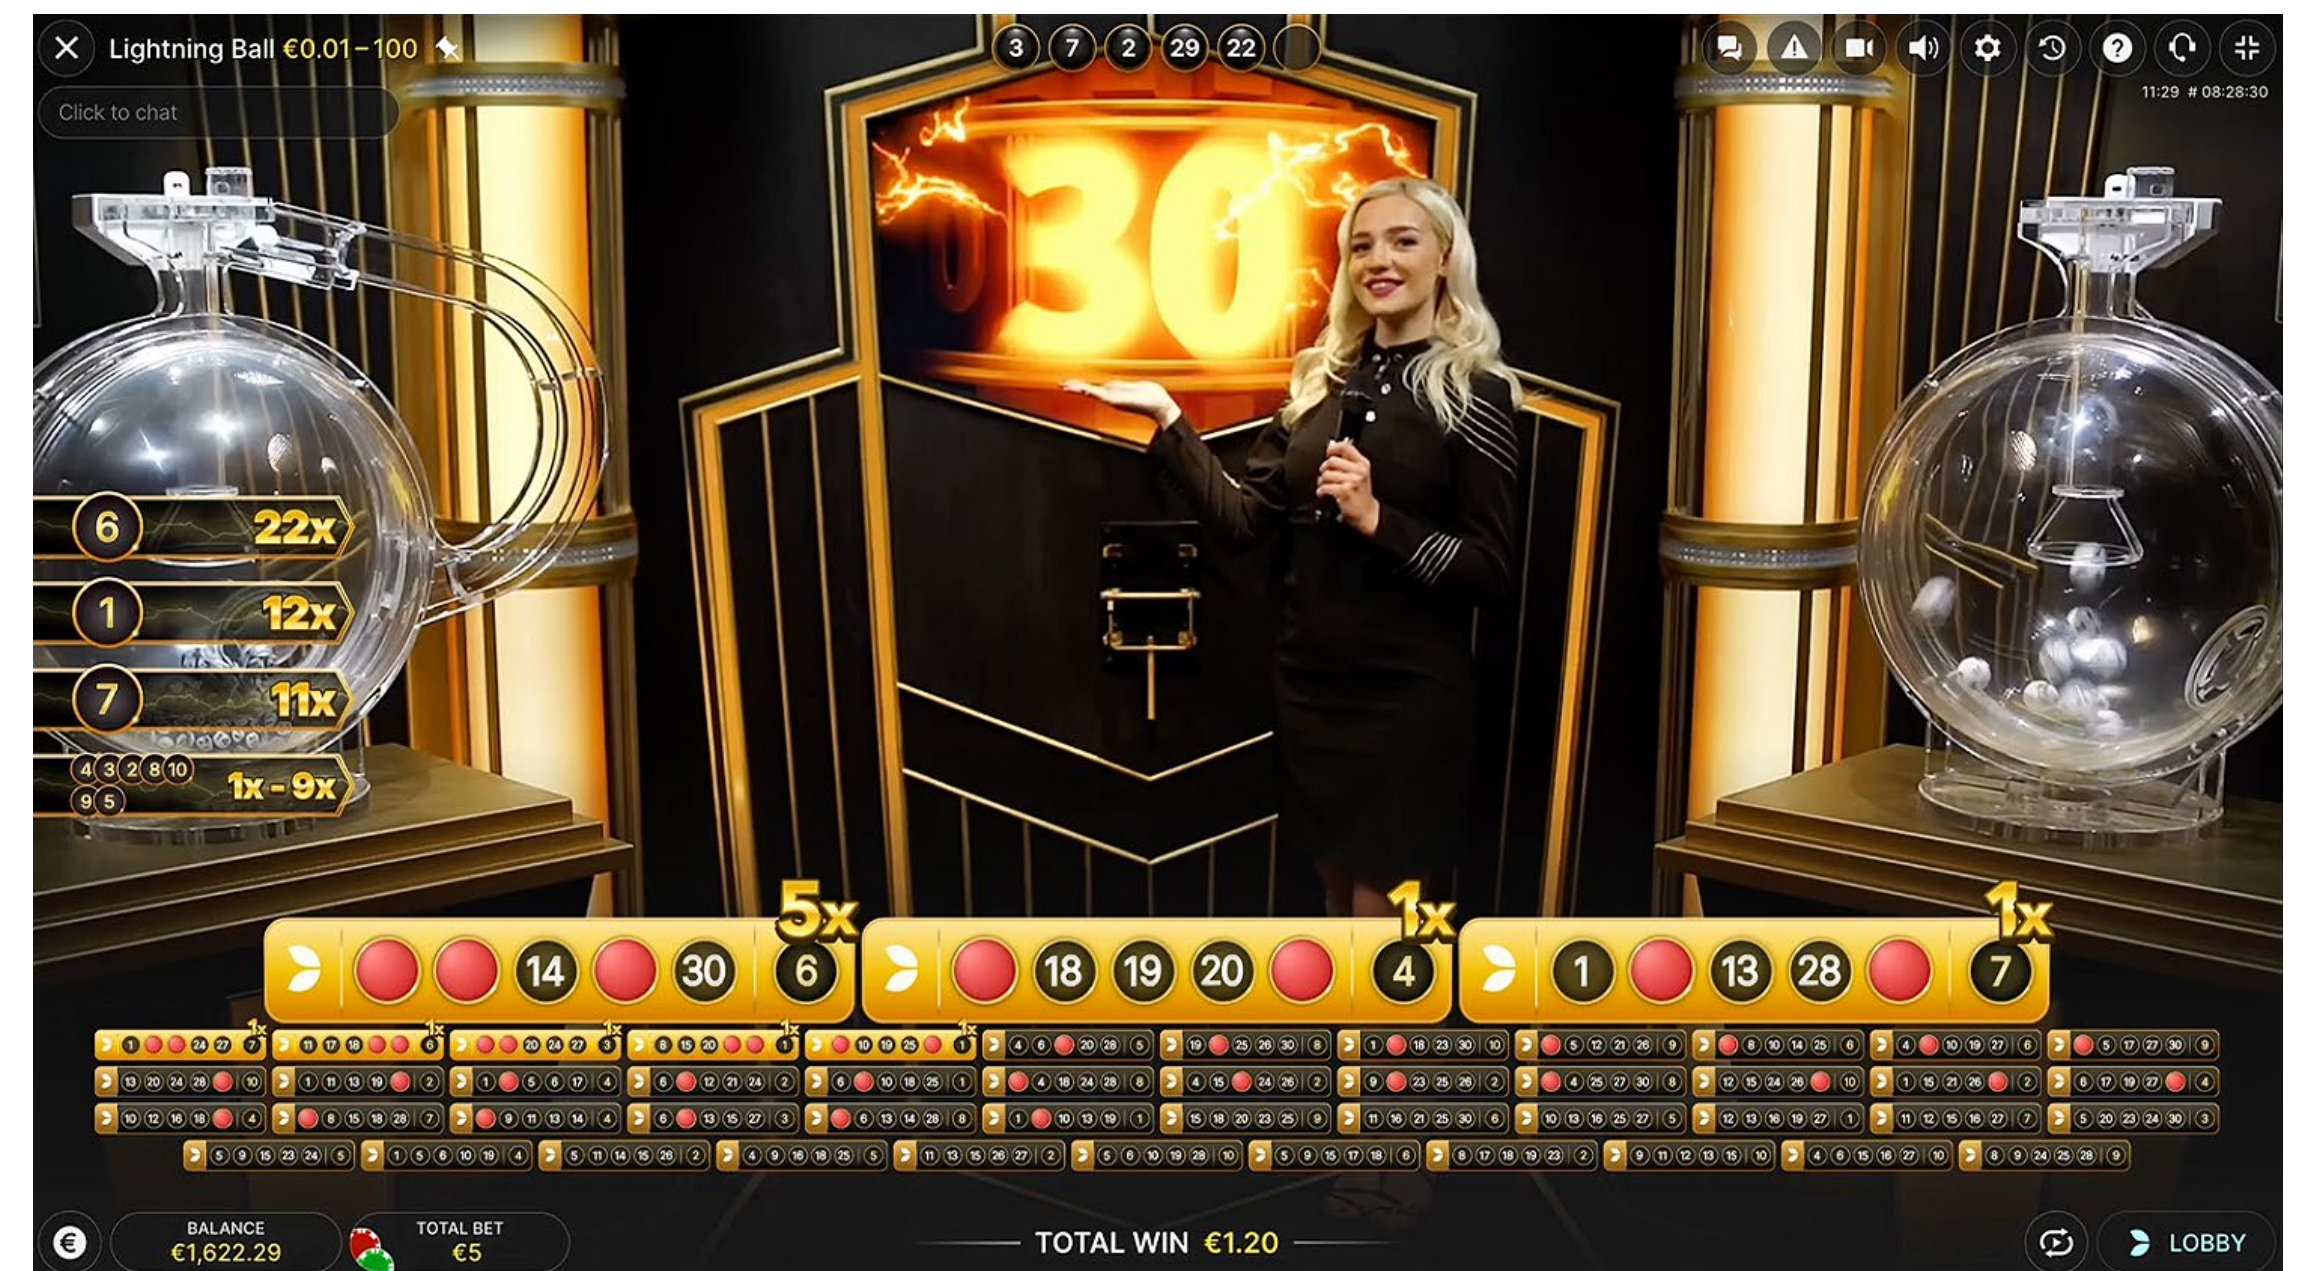

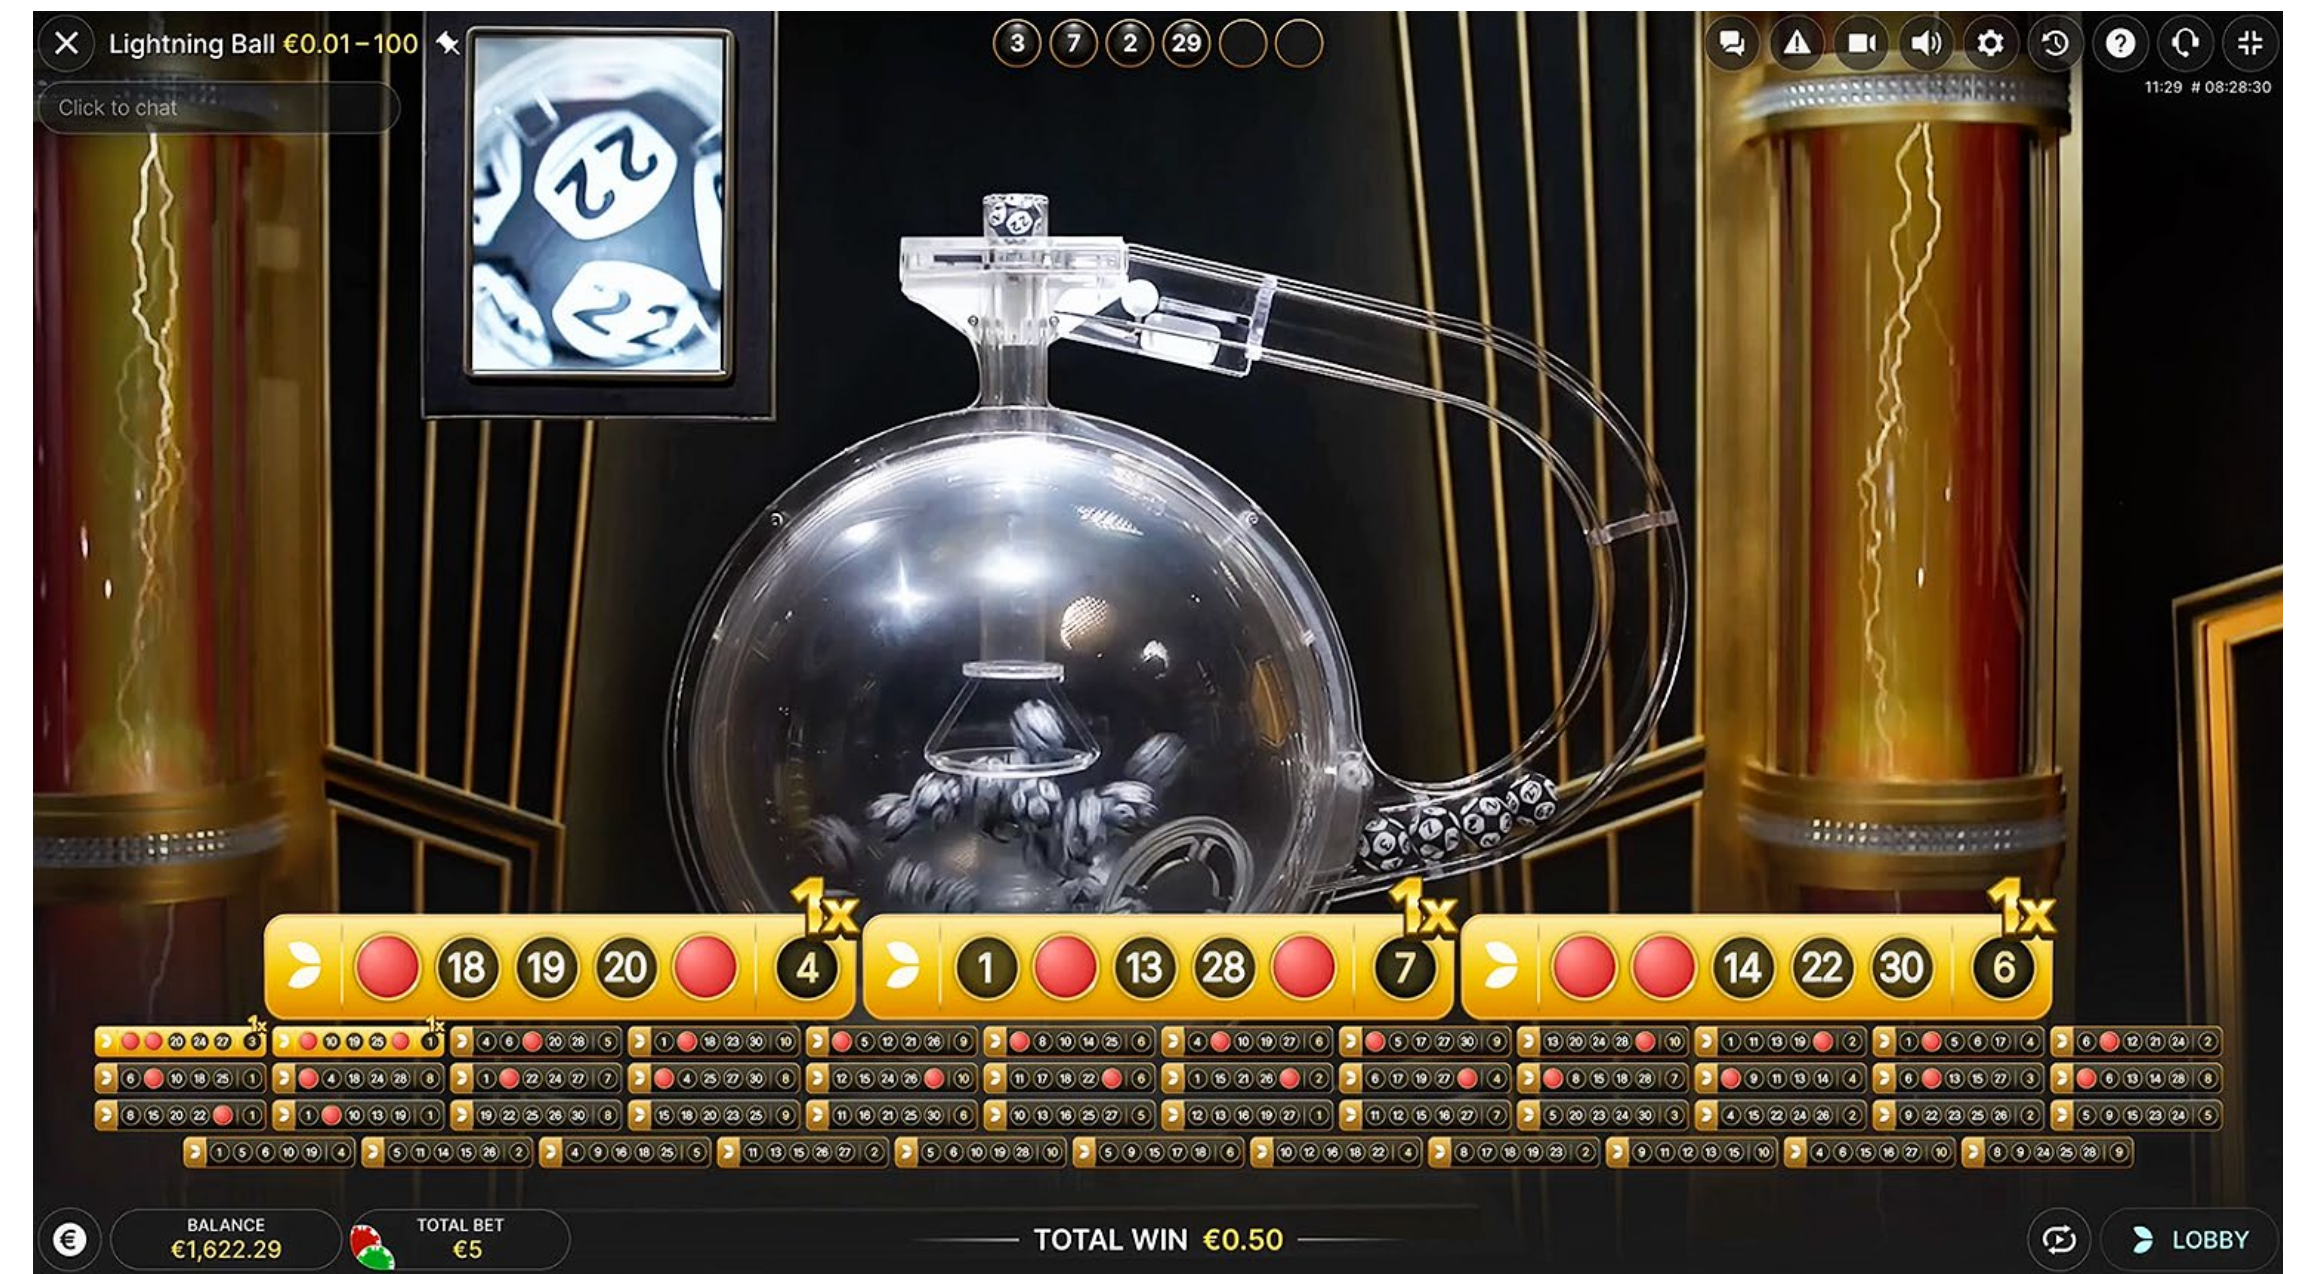

Any drawn number that matches the number on the ticket will be marked with a red daub.

As the balls are drawn, the tickets will be automatically sorted, where the tickets closest to winning are placed at the top.

LIGHTNING MULTIPLIER

When five balls are drawn from the first ball-drawing machine, the game host pulls a lever to generate a random Lightning multiplier from 2x to 50x.

After that, the game switches to the Powerball machine, which draws one ball from a pool of 10. If the Powerball matches the power number on a ticket with at least one other regular number match, the Lightning multiplier is applied to that ticket, boosting your winnings.

RESULTS

After the round ends, only the winning tickets are left on the screen. The tickets change colour to gold or red depending on the number of matches.

You win by matching two or more numbers on a ticket, and the payout is based on the amount of numbers matched.

If the ticket had a Lightning multiplier, the payout is multiplied by the Lightning multiplier value (up to 50x).
