BANKING BEYOND BANKING

Ever wondered what it looks like down in the vault?

Well now's your chance! Relax has been invited deep into the night to join an infamous bank robber on his quest for riches. Set against a 6x6 reel area and the chance at 'earning' over 30,000 x this game is jam packed with rewards. With a unique mechanic Collect and Multiply - Once you start with a winning cluster of 5 matching symbols - all additional same symbols that land near by are also collected - these then multiply against each other and then award after their payout! This can lead to huge multipliers possible on multiple symbols - guaranteeing to get your hearts racing!

Remember to bring a large empty bag for all those gems!

WIN PROBABILITIES

BIG WIN
(bet multiplier 15+)
1 in 89

EPIC WIN
(bet multiplier 60+)
1 in 436

MEGA WIN
(bet multiplier 30+)
1 in 189

FEATURES

COLLECT AND MULTIPLY

The Collect & Multiply feature is triggered when any matching cluster is formed. Once active, the win will be collected into one symbol position from the initial win and re-spins are awarded.

During the re-spins it's possible to collect additional symbols to the initial cluster by landing a symbol from the same group adjacent to the collection symbol which are represented as bags.

It's possible to collect multiple bags in the same re-spin. When multiple bags of the same group have been collected, they will multiply against each other when the re-spins end.

FREE SPINS

Free Spins are triggered by landing 3 or more Bonus symbols in the same game round. Once in the free spins, it's possible to land additional Bonus Symbols that award +1 spin.

WIN UP TO 30,000X YOUR BET

If the sum of all wins achieved in free spins reaches 30,000x bet or higher, the player is awarded 30,000x bet for the whole free spin feature.

BUY FEATURE

Buying "Free Spins" will cost 100x the reference bet size, and starts a round with a guaranteed free spins trigger.

PAYOUT MECHANICS

Only collection symbols award wins, the win is calculated by multiplying the symbol counts on all matching collection symbols and finally multiplying that value with the symbol value specified in the paytable. Collection symbols are created when 5 or more adjacent matching symbols form a cluster, and they are updated when any matching symbol is adjacent to them.
