Game Theme and Graphics

Somewhere in the tropical seas of the Caribbean, a very strange crew of pirates navigates their shabby ship to undiscovered treasures. In Playson's new game "Pirate Sharky" a squad of peculiar fish got their hands on an old pirate vessel and are now on a quest to find some fame, adventures and of course gold.

Only the best were meant to get on the team with the Pirate Sharky himself, but somehow he ended with these fellows... Pirate Sharky's team include a trustworthy crab-cook, phlegmatic cannoneer seahorse, unshakable skipper squid and a rather odd pupperfish, that is in charge of explosives on the ship. Sharky's squad members make up 4 high-paying symbols of the game, while the low-paying symbols are theme-styled royals.

Pirate Sharky himself and the money bags are a different story though. Pirate Sharky is a scatter symbol in the main game, while the money bags are merely middle-paying symbols. However, it gets much more interesting in Free Spins – Pirate Sharky gets finally unchained during Free Spins and gets all the gold that he desires. Money bag symbols are activated during the Free Spins and whenever Pirate Sharky and money bags are on the screen, he gets to loot all their desirable values.

Moreover, whenever Pirate Sharky loots enough bags, he pulls out his trusty treasure map and looks for more treasures on the reels, while also multiplying all their winnings!

It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on <http://www.idquantique.com>

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format
