# Game rules

Welcome to Cannonade! Video Slot with Free Spins and Win Streaks.

## ABOUT THE GAME

Cannonade! is a Video Slot with 6 reels and 5 rows. Win up to 17,000x total bet in this swashbuckling adventure where any win opens up more ways to win, up to an incredible 46,655 ways. The game has 10 regular paying symbols. There is also a Free Spin symbol.

## Win Streaks

This game features Win Streaks, meaning that winning symbols are held in position, and the reels respin until no additional winning symbols land in view. Extra Free Spin symbols can land in a Win Streak, and collecting 3 or more awards Free Spins. Each time the player gets a Win Streak win, for each symbol in a winning combination, a blocker symbol disappears from the reel that they appear on, to open up more ways to win. If more than one symbol forms a win, the lowest paying winning symbols are upgraded to the highest paying held symbol.

## Free Spins

Landing 3 Free Spin symbols awards 6 free spins. Landing 4 Free Spins symbols awards 9 free spins. Landing 5 Free Spin symbols awards 12 free spins. Free Spins are played with the same bet as the activating spin. Landing the Free Spin symbol awards +1 free spin, and removes the lowest paying symbol from the reels.

## Buy Into Free Spins

Players can pay x100 to buy into Free Spins with 6 free spins. Players can pay x500 to buy into Free Spins with 15 free spins.

## Free Spins Gamble

When entering a Free Spins, players can gamble to upgrade the number of free spins from 6 to 9 spins, or from 9 to 12 spins. If unsuccessful, the Free Spins session is lost.

## HOW TO CALCULATE WINS WITH “WAYS TO WIN”

- To calculate the total Ways win, add all the symbol wins together.
- To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the leftmost reel.
- If the number of consecutive reels containing the symbol is 3 or greater counting from the leftmost reel, find the corresponding win amount in the dynamic pay table.
- If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example: if the first reel contains 2 symbols, the second reel has 3 symbols and the third reel has 2 symbols, the total multiplier is counted as follows:  $2*3*2=12$  (total multiplier).
- The above doesn't include Free Spin symbols which do not need to be on consecutive reels to award a prize.
- After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.
- There can be a discrepancy between sum of the individual wins in collection Free Spins from what is displayed in the total win end screen. The total win end screen displays the final rounded win.
