Symbol Details

WILD

The red symbol with a horse and the word "WILD" is the **WILD** symbol.

The **WILD** symbol can substitute for any symbol, except for special **WILD** symbols, to make the best possible winning combination.

Special Wild

The gold cup symbol is the **special WILD** symbol.

The **special WILD** symbol can substitute for any symbol to make the best possible winning combination and triggers the **Gold Cup Respins** feature.

The **WILD** and **special WILD** symbols can land on all reels.

Game Features

Gold Cup Respins

Whenever a **special WILD** symbol appears anywhere on the reels, the **Gold Cup Respins** feature is triggered.

On each spin, the **WILD** symbol moves to an adjacent symbol and leaves a regular **WILD** symbol on its path.

This will repeat until the **WILD** symbol returns to its starting position (the **special WILD** symbol).

The final respin occurs after the last **WILD** symbol to appear on the reels has returned to its starting position.

WILDS can only move left, right, up and down. **WILD** symbols cannot move diagonally.

The feature starts and ends automatically.

Sporting Legends™ Jackpot:

The Daily Jackpot ticker shows the value of the Daily Jackpot. The jackpot is guaranteed to be won within the remaining time displayed on the ticker.

The central ticker shows the value of the Mega Jackpot.

The Weekly Jackpot ticker shows the value of the Weekly Jackpot. The jackpot is guaranteed to be won within the remaining time displayed on the ticker.

Any bet of any size can win the Daily Jackpot, the Weekly Jackpot or the Mega Jackpot, but the larger a bet is the more likely it is to trigger 1 of these jackpots.

The jackpots are linked to several games, which are available through multiple casinos. The jackpots can be won by placing a bet in any of these games in any of the participating casinos.

For each bet placed, the operator contributes to the jackpot fund. Each contribution is equal to 2% of each bet placed. 84.5% of each contribution funds the current jackpots, and 15.5% funds the seed pot for the next jackpots.

The seed pot funds the Daily Jackpot seed, the Weekly Jackpot seed and the Mega Jackpot seed. (The seed is the amount of money a jackpot begins with.)

As the Daily Jackpot, the Weekly Jackpot and the Mega Jackpot are funded by the operator, these jackpots do not affect the RTP of the game.

Funds may sometimes be removed from the seed pot to fund other promotions. The terms and conditions of these promotions are available on the casino website throughout the promotion periods.

If the current Daily Jackpot is won before 9:00 p.m. GMT (BST during British Summer Time), 1 or more additional jackpots may become available to win within the remaining time shown in the Daily Jackpot ticker.

If the current Weekly Jackpot is won before 12:00 p.m. GMT on Saturday (12:00 p.m. BST during British Summer Time), 1 or more additional jackpots become available to win within the remaining time shown in the Weekly Jackpot ticker.

Note:

- If 2 players win a jackpot at the same time, the 1st player will be awarded the seed and the progressive amount, and the 2nd player will win the seed together with any accumulated progressive part accrued in the time between when the 1st player won the jackpot and when the 2nd player won the jackpot.
- If no gameplay takes place at the time at which a jackpot must be won (either the Daily Jackpot or the Weekly Jackpot), then that jackpot will be triggered by the first bet placed the following day.
- Game malfunctions void all payouts.

Jackpot Ticker Specification

As the Sporting Legends™ Jackpot has jackpots that are guaranteed to be won by specified times, additional timing data must be shown in the tickers. This is done via a new attribute of the amount element: guaranteedHitTime. Information about this attribute is available on page 15 of the Playtech Progressive Jackpot Ticker Specification document.

Example of XML responses per jackpot level (these are examples with Playtech casino: licensees need to use their own relevant instances names and ticker URLs).

Level 1 – Daily JP:

```
<request currency="eur" startTimestamp="1516790427" execInterval="600" game="sljp-1" casino="playtech" info="1">
<gamedata timestamp="1516790521" local="0" winc="0" gamegroup="sljp" game="sljp-1">
<amount-list>
<amount pos="0" sign="€" step="0" wins="0.00" instancecode="" currency="eur"
guaranteedHitTime="1513123200">1200.00</amount>
</amount-list>
</gamedata>
</request>
```

Level 2 – Weekly JP:

```
<request currency="eur" startTimestamp="1516790427" execInterval="600" game="sljp-2" casino="playtech" info="1">
<gamedata timestamp="1516790525" local="0" winc="0" gamegroup="sljp" game="sljp-2">
<amount-list>
<amount pos="0" sign="€" step="0" wins="0.00" instancecode="" currency="eur"
guaranteedHitTime="1513555200">12000.00</amount>
</amount-list>
</gamedata>
</request>
```

Level 3 – Regular JP (no countdown = no guaranteedHitTime attribute):

```
<request currency="eur" startTimestamp="1516790427" execInterval="600" game="sljp-3" casino="playtech" info="1">
<gamedata timestamp="1516790527" local="0" winc="0" gamegroup="sljp" game="sljp-3">
<amount-list>
<amount pos="0" sign="€" step="0" wins="0.00" instancecode="" currency="eur">120000.00</amount>
</amount-list>
</gamedata>
</request>
```

Example of Level 1 XML response with the new parameter highlighted:

```
<request currency="eur" startTimestamp="1516621201" execInterval="600" game="sljp-1" casino="playtech" info="1">
  <gamedata timestamp="1516621284" local="0" winc="0" gamegroup="sljp" game="sljp-1">
    <amount-list>
      <amount pos="0" sign="€" step="0" wins="0.00" instancecode="" currency="eur" guaranteedHitTime="1513123200">1200.00</amount>
    </amount-list>
  </gamedata>
</request>
```

In case of custom implementations, these are the expectations that should be met:

- Level 1 and Level 2 should alternate between the countdown and ticker values every 5 seconds.
 - Level 3 is a regular ticker without the countdown.
- The countdown should be shown in hours, not days (HH:MM:SS).
- The *guaranteedHitTime* parameter in the xml is a Unix timestamp that represents the jackpot win time in UTC time. The countdown must always display the time left until the guaranteed hit time (this countdown time is identical for every time zone).
