

GOLD DIGGER: MINES

About

Join our lucky prospector, Gold Diggin' Gus, as he enters the mine to go in search of the lucrative golden nuggets while avoiding the dreaded TNT Mines - it's Gold Digger Mines. Gold Digger Mines is iSoftbet's first ever "mines" release - a simple pick & click game where the aim is to uncover gold nuggets to increase the Win Multiplier, while at the same time making sure to avoid the TNT Mines, which will lose the accumulated prize and end the game round. The more successful picks you make, the higher the Win Multiplier will go, but nuggets become harder to find, while the TNT Mines are more likely to steal all your hard earned gold. Paying homage to one of our most popular ever slots, Gold Digger Mines is an exciting, fast-paced gaming experience, where the player can control the volatility and feel of the game by choosing their own grid settings, from bet size to the number of Mines contained within the grid - the more starting Mines on the grid, the faster the nugget values will grow, but the TNT Mines are also harder to avoid, making for a high octane thrill ride with each subsequent pick. Gold Digger Mines brings together the much-loved design and theme of the original slot, while also offering a whole new style of game play perfectly suited to the modern online player, with increasing excitement during every round and the opportunity to Cash Out at any stage. Due for global release in early 2022, Gold Digger Mines looks sure to be another successful title in our growing games portfolio and would be an exciting addition to any online casino.

THE STATS

Shows the value of the next gold nugget if you choose to continue the round.

PAYOUTS

The payout for the game is determined by a bet multiplier which increases after each winning pick. The multiplier is dependent on the number of gold nuggets found and the number of TNT Mines. The current grid set-up always represents the true probability of picking a nugget or a TNT Mine.

GAME OVERVIEW

Gold Digger Mines is played on a 5 x 5 grid, consisting of 25 squares. Behind each square is either a gold nugget or a TNT Mine. Uncover gold nuggets to increase your prize - you can choose to cash out after a successful pick. If you find a TNT Mine, you will lose your accumulated prize and the game round is over. The more gold nuggets you find, the bigger the rewards.

GOLD DIGGER: MINES

Game Features

HOW TO PLAY

At the start of the game, choose your bet size and the number of TNT Mines. You can choose 1, 2, 3, 5, 7, 10 or 15 Mines. The more mines you choose, the faster your winnings can grow - but gold is harder to find. Press PLAY to start and choose a square to uncover. Each gold nugget found will increase your prize, a TNT Mine will end the game round.

CASH OUT

Certified Markets

EUROPE

-  Sweden
-  Estonia

Shows the current value of your prize, which you can choose to collect (Cash Out). After a gold nugget is found, this value will increase and you can Cash Out after any successful pick.

REMAINING PICKS

Shows the number of remaining picks you are allowed to make. Depending on the number of Mines, you will have a set number of initial picks available. After each gold nugget is found, the number of remaining picks will count down by one. If remaining picks run out, you will have reached the Maximum Win.

MAXIMUM WIN

Shows the maximum possible win you can reach with the current grid. Maximum Win is dependent on the initial bet and the number of starting Mines. If Maximum Win is reached, no more picks are available and you must CASH OUT.
