Additional information

How to Calculate Payline Wins

- To calculate your total payline coin win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.
- If three or more identical symbols are lined up, find the coin win value in the dynamic Pay Table. There you can find the value for all symbols for 3 in a row, 4 in a row, 5 and 6 in a row. Only the highest winning combination per line is paid out.
- If the winning combination starts with three Wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.
- The above doesn't include Scatter symbols which do not need to be on a payline to award a prize.
