Game rules

How To Play?

The player chooses their bet amount using the + and – buttons. All wins are multiplied by the bet. For details on win payouts see the game payable. To play the game, the player presses the SPIN BUTTON. If playing on PC and if enabled in the game options menu, the space bar can also be used to spin the reels.

Winning symbols are raised over the reels when the spin stops. Wins pay from left to right.

Wild Symbol

The Wild symbol substitutes for every symbol apart from scatters. The Wild symbol has an alternative look and animation when playing in Free Spins.

Free Spin Scatter

3 Free Spins Scatters will award Win Time Free Spins. Free Spins Scatters can land on reels 1, 3, and 5.

Top Paying Symbols

The 2 top paying symbols have alternative looks and animations when playing in Free Spins. Their payouts remain the same.

Win Time Free Spins Feature

3 Free Spins Scatters will award Win Time Free Spins. You will be awarded 60 seconds of spins. The reels will spin as normal and wins will be awarded as normal for the awarded time, which will be displayed on the stopwatch next to the reels. When the awarded time has expired, the current spin and any wins will be awarded before the feature ends.

A light will move around the reels on the lapper board during the feature. Every time a full lap is completed, the win multiplier will increase by +1x and all subsequent wins (including any win currently being awarded) will be multiplied by this amount.

Bonus time is calculated by the game server. Perceived time may vary according to device performance, and will not affect game results.

Boost Scatter

Landing a Boost scatter in view during Free Spins will increase the speed of the reel spin, award count-ups, and the light on the lapper board for a short amount of time. Landing another Boost

scatter when this is active will increase the time of the boost.

Extra Time Scatter

Landing an Extra Time Scatter in view during Free Spins will increase the remaining time on the stopwatch. If the time on the stopwatch has already expired, the Extra Time Scatter will still take effect after any wins have been awarded.

Turbo Lock Respin Feature

After any winning spin in the base game, the Turbo Lock Respin Feature might trigger. Any symbols involved in the win will lock in place. All other reel positions will respin and any new winning symbols will lock as well. This will continue for 5 seconds, after which the final win will be awarded.

Bonus Bet

BONUS BET allows you to increase your chance of hitting the Win Time Free Spins feature by increasing your bet.

Press the BONUS BET button to open the BONUS BET window.

The values along the slider show the average number of spins it will take to trigger a Free Spins bonus, as well as the cost of each selection. Moving the slider will select a Bonus Bet mode. You can adjust your normal bet size on this screen. Doing so will update the costs on the slider. Press ACTIVATE to return to the game screen with your selected BONUS BET level active. Press CANCEL to return to the game screen without BONUS BET active.

How to Calculate Payline Wins

Ways slots remove paylines to make it easier to see the wins. A win is formed from consecutive symbols starting from the first reel.

If any of the reels contain more than 1 instance of a symbol, the win will be multiplied.

Multiply the number of symbols on each of the reels to get the final payout multiplier.

For example, if the first reel contains 2 symbols, second reel 3 symbols and third reel 2 symbols, the payable value is multiplied by $2 \times 3 \times 2 = 12$.
