

BACCARAT

Baccarat is played with the objective of predicting whose cards will score the number of points closest to 9, the Dealer's (Banker) or the Player, using 2 or 3 cards.

HOW TO SET A BET

On the baccarat table are 3 betting boxes into which the Player can place their bets: one marked 'Player', another marked 'Banker', and the other marked 'Tie'.

The Player decides the size of the bet and how to set the bet in the 3 betting boxes.

Once the bet is set, the Player must push the 'DRAW' button to start the game.

HOW TO PLAY

The Dealer deals the cards in the 'Player' and 'Banker' areas.

The goal of the game is to predict the winner in advance, by choosing either the Player, Banker, or Tie bet. The winner of the game is determined by calculating which hand is closest to 9.

The hands value is the sum of the 2 (or 3) cards.

The value of each single card is:

- Ace = 1 point.
- Cards numbered from 2-9 are worth their face value.
- Picture cards and Tens are each worth zero points.

Points of the hand are summed up. If the sum of points is greater than 9, then 10 points are subtracted until points fall within the range of 0 to 9.

So the final sum of the points per hand is within the range of 0 to 9.

THIRD CARD RULES

Baccarat rules call for the Player to always go first. The Banker's hand depends on the Player's hand.

Here are the rules:

- If either the Player or Banker is dealt a total of 8 or 9, both the Player and Banker stand.
- If the Player's total is 5 or less, then the Player will receive another card, otherwise, the Player will stand.
- If the Player stands, then the Banker hits on a total of 5 or less.

PAYTABLE

Once the cards are dealt and played out, the Player wins if their prediction about the outcome of the game was correct. The payouts for each type of bet are as follows:

- Winning bets on the Player are paid 1 to 1 the bet value.
- Winning bets on the Banker are paid 0,95 to 1 the bet value (with 5% commission).
- Tie bets are paid 8 to 1. In case the Tie bet wins, bets on the Player and Banker push (are returned).
