KEY FEATURES

HOW TO PLAY

The aim of the game is to predict the outcome of the shake of the three dice. Players can place their bets on one or many betting options indicated on the betting grid. After the betting time is closed all three dice are shaken in the dice shaker. Several bet spots have multipliers randomly assigned to them and they will be highlighted before the dice come to rest and the result is known. If the player's bet is placed on the bet spot with the applied multiplier, the bet is multiplied accordingly.

BET TYPES

Many different bet types are available - small/big, even/odd, total, single, double, triple, any triple and combination.

SMALL BIGG

place your bet on the total of the three dice being Small (4-10) or Big (11-17).

EVEN ODD

place your bet on the total of the three dice being Odd or Even.

TOTAL

is the total of the three deice and excludes 3 and 18. You win If the total of the three dice adds up to the Total number on which you placed your bet.

SINGLE

place your bet on any of the six betting areas labelled One, Two, Three, Four, Five or Six which represent the six face values of a dice.

DOUBLE

place your bet on any of the six Double-labelled betting areas. To win, 2 or 3 dice must show the same number.

TRIPLE

place your bet on any of the six Triple-labelled betting areas. To win, all 3 dice must match the number chosen.

ANY TRIPLE

place your bet on this box to cover all six different Triple bets at once. To win, all three dice must show the same number.

COMBINATION

place your bet on any or all 15 possible 2 dice combinations.
