Any symbol can land as a block sized up to 6x6. Blocks will land on every spin. Block sizes and reels are determined by software using weighting tables. All blocks on 2 reel wide blocks appear as 2x2 block symbols. All blocks on 3 reel wide blocks appear as 3x3 block symbols. All blocks on 4 reel wide blocks appear as 4x4 block symbols. All blocks on 5 reel wide blocks appear as 5x5 block symbols. All blocks on 6 reel wide blocks appear as 6x6 block symbols. Gigablox symbols are intially presented as blocks, but are then "broken down" into individual 1x1 symbols for adjudging any wins, and also for calculating the number of Scatters that appear.
