## GAMBLE WHEEL

Before playing Unlimited Free Spins, you have the option to gamble your Unlimited Free Spins.

Winning the gamble gives you a higher starting multiplier and higher starting reels, losing the gamble takes you back to the base game without playing the Free Spins. You can gamble up to twice. Win one gamble to increase starting multiplier from x2 to x3 and reel height from 3 to 4. Win another gamble to increase the multiplier to x4 and reel height to 5.

The gamble wheel can land on the special golden field that gives an x5 starting multiplier.

# GAME FEATURES

## UNLIMITED FREE SPINS

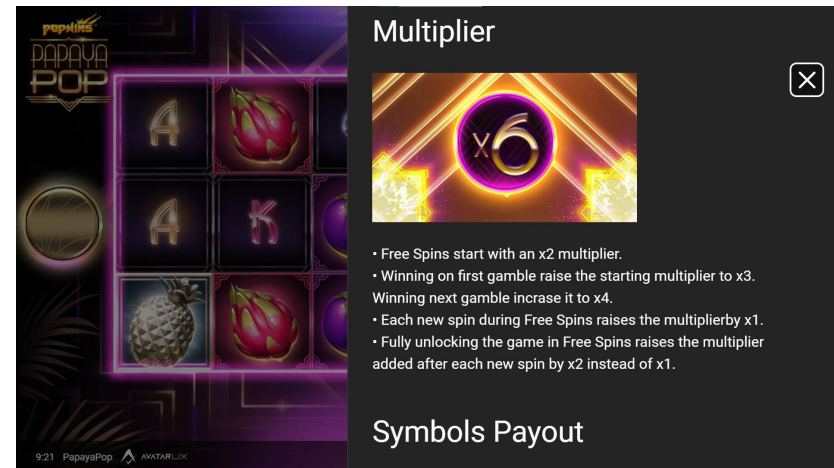

Unlimited Free Spins always have 3 spins. Whenever a spin is a win, the counter resets back to 3. Free Spins play out automatically and ends if the counter empties out (reaches 0) where the lights on the counter indicate the number of spins left. Free Spins start with an x2 multiplier. The progress of unlocking the reels in Free Spins does not fully reset between each spin. The progress is only reset down to the shortest reel.

# GAME FEATURES

## MULTIPLIER

Free Spins begin with 2x Multiplier. Every new spin the Multiplier increases by 1. After unlocking all reels this raises to 2, so after unlocking all reels every new spin increases the Multiplier counter by 2. Multiplier is applied to every win.

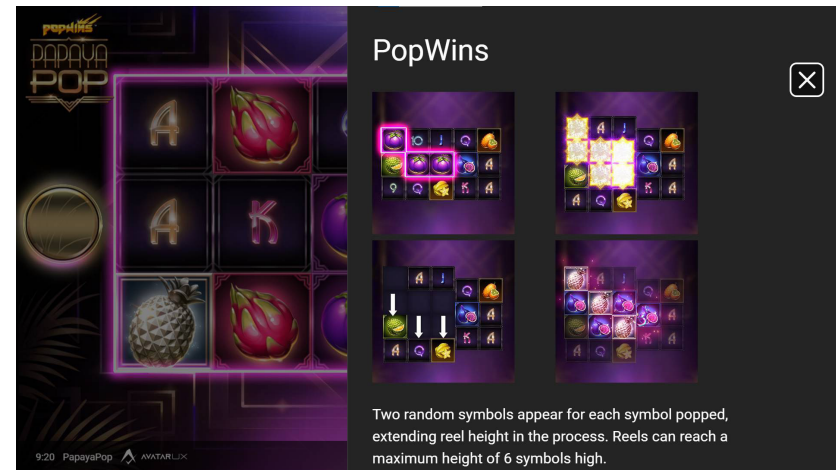

# GAME FEATURES

## PopWins™

Winning symbols 'Pop' and 2 new symbols appear in their place. Each reel can reach a maximum of up to the 6 symbols in the base game and 9 in Free Spins.

## UNLIMITED FREE SPINS GAMBLE

Before playing Unlimited Free Spins, you have the option to gamble your Unlimited Free Spins

Free Spins start with an x2 multiplier

Each spin increases the multiplier by 1 after the wins are paid

Fully unlocking the game in Free Spins raises the multiplier increase to 2 after each spin

The progress of unlocking the reels in Free Spins does not fully reset between each spin

Super high symbol appears during Free Spins only

The progress is only reset down to the shortest reel.

For example, if the reels are of height 7-7-8-9-7 at the end of a spin, the next spin starts with reel heights 7-7-7-7-7 because the shortest reel was 7.

# GAME RULES

## HOW TO CALCULATE DROPDOWN WINS

To calculate your total WIN ALL WAYS win, add all your symbol wins together

To calculate a single symbol win, count the number of subsequent reels that contain the symbol, starting from the left or the right.

If the number of subsequent reels containing the symbol is three or greater counting from the left, find the corresponding win amount in the paytable.

Otherwise, if the symbol was not present on three subsequent reels counting from the left, count from the right

If the number of subsequent reels containing the symbol is three or greater counting from the right, find the corresponding win amount in the pay table.

# GAME RULES

## HOW TO CALCULATE DROPDOWN WINS

If any of the reels contain more than 1 instance of the winning symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example, if the first reel contains 2 symbols, the second reel 3 symbols and the third reel 2 symbols, the pay table value is multiplied in the following manner:  $2*3*2=12$  (total multiplier).

5 of a kind wins only pay from one side.

During gameplay, different way wins are added together.

## RANDOMIZATION

The reels are spun with a fair and equal chance for each stop position by a certified random generator.
