## Business Summary

**Wicked Dice** is the latest slot in the popular Wicked series. This wicked little title shakes things up with Expanding Wilds that could bring the prizes tumbling in and the Gamble feature where you could double your winnings.

The **Wicked Dice** game runs on HTML5 and supports all screen resolutions up to full HD.

## Game Details

## Business Case

- Expanding Wilds
- Predictor feature
- Gamble feature

## Symbol Details

### Expanding Wild Symbol

The Wild symbol  may appear on all reels during the main game.

After every spin the Wild symbol  may expand into neighbouring positions if the expanding will contribute to a win.

The Wild symbol  substitutes for all symbols except for the Scatter symbol.

### Scatter Symbol

The Scatter symbol  appears anywhere on the reels during the main game.

## Game Features

### Expanding Wild

The Wild symbol may appear on all reels during the main game.

Any Wild symbol appearing in win combination on reels expands to cover all neighbouring positions on that reel.

Any wins will then pay according to the win lines.

Expanding Wild symbols can expand to substitute for any symbol except for the Scatter symbol.

## Predictor Feature

The Predictor feature is triggered randomly during the main game round, landing Wild symbols on the reels.

Once the feature is triggered, Wilds expand as the other reels continue to spin. When all reels stop, wins pay according to the paylines.

During the Predictor feature Wild symbols can reveal or substitute for any symbol except for the Scatter symbol.

## Gamble Feature

The Gamble can be selected after any win by clicking on the flashing Red/Black spade icon at the bottom of the screen.

The player then tries to predict the next card at the top of the screen, choosing either Red or Black.

If Red or Black choice is correct, the Gamble amount is doubled (x2). If their choice is incorrect, the Gamble amount is lost, and the gamble game round is finished.

The Gamble feature can also be automated by clicking on the spade icon, which is white when the game is idle. After clicking the white spade icon, the Gamble Settings window appears where the player may change the range of wins needed to launch the Gamble feature. When the win settings are matched the player will enter the Gamble feature game.

## Casino's Exposure

---

The casino's maximum exposure from a single game round is limited by the win capping mechanism. The win capping defines that the total win from a single game round cannot exceed 500,000 Euro. Should the total win from a game round exceed this number, the total win will be capped.

Top Win information per bet got during simulation of 1,000,000,000 bets:

<b>Highest win</b>	1,005 x Total Bet
<b>10<sup>th</sup> highest win</b>	1,005 x Total Bet
<b>100<sup>th</sup> highest win</b>	1,000 x Total Bet

It is highly inadvisable to exceed the pre-set win capping values and game limits.

## Default Coin Bet Values at Upload

Skywind will upload the game with the below default Coin Bet values (the coin marked in **bold** is the default selected coin bet for all players as they enter the game for the very first time):

CURRENCY	COIN BETS	BET OPTIONS

Please contact the Skywind support team if you want to make changes in the Coin values.

Game limits of all new games must ALWAYS be reviewed by the casino operator prior to the game's release to players. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits and updates of coin values.
