Luxor Gold: Hold and Win

Game Theme and Graphics

“Luxor Gold” is a noteworthy addition to Playson’s “Hold and Win” game portfolio, which embraces the popular Egyptian theme. The graphics of the game was designed to resemble the atmosphere of an ancient temple. Mysterious and alluring - it hides pharaoh’s golden treasures within its walls. Iconic golden coins as a Bonus symbol alongside the treasure chest catch the eye and dazzle with their luxury. The main game background is perfectly complemented by the animations, creating the cozy aura of twilight on the ancient temple terrace. While Bonus Game mode gives a sense of heat and radiance of the golden treasures, revealed for those fortunate ones. The stacked Wild symbol represents the charming pharaoh-looking main character, while high-paying symbols depict the temple tiles with ancient Egyptian symbols. Accurately selected and perfectly polished animations and sounds allow a player to fully immerse in the atmosphere of ancient Egypt and enjoy the pleasant gameplay.

Randomization

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Quantis, physical random number generator exploiting an elementary quantum optics process. Quantis has been evaluated and certified by the Swiss Federal Office of Metrology (also known as METAS), the Swiss national organization in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on <http://www.idquantique.com>.

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format <http://marketing.idquantique.com/acton/attachment/11868/f-0117/1/-/-/-/-/Quantis%20Certifications%20Collection.pdf>.

Quantis has also been approved by national authorities and can be used for gaming applications.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

Information to the Player

Players have access to game rules from within the game at all times.
