Cat Wilde and the Pyramids of Dead

Cat Wilde and the Pyramids of Dead is a 5-reel, 3-row video slot game with 10 paylines.

The Pyramid Scatter symbol acts as a Wild, and substitutes for all other symbols (except for special EXPANDING SYMBOL). 3 or more Pyramid Scatter symbols trigger one of the bonus games: Jackpot Round, Instant Prize or Free Spins. Once 2 Pyramid Scatters land, they show the potential bonus game awarded on landing one or more additional Pyramid Scatters.

3 or more Pyramid Scatters can trigger a Jackpot Round with up to 4 prizes, each corresponding to an ancient pharaoh: Khufu=20 x total bet, Tiye=100 x total bet, Tutankhamun=250 x total bet, Mereneith=1000 x total bet.

In the Jackpot Round, you can pick from 12 urns, each containing the spirit of an ancient pharaoh, until you match 3 and win the corresponding prize. The available prizes are based on the number of Pyramid Scatters landed when the feature was triggered:

3 Scatters trigger the Jackpot Round with all 4 prizes.

4 Scatters trigger the Jackpot Round with top 3 prizes.

5 Scatters trigger the Jackpot Round with only the top 2 prizes.

3 or more Pyramid Scatters can transform to the Instant Prize Scatters and pay their cumulative displayed value.

3 or more Pyramid Scatters can trigger Free Spins. The number of Free Spins awarded is based on the number of Scatters landed:

3 Scatters award 8 Free Spins.

4 Scatters award 10 Free Spins.

5 Scatters award 15 Free Spins.

1 regular symbol (except Scatter) is chosen at random to become a special expanding symbol in Free Spins. When enough of the respective symbol lands, they expand to cover all reel positions. These symbols do not need to appear adjacent to result in extra wins.

During Free Spins, landing 3 or more Pyramid Scatter symbols re-triggers Free Spins. An additional 5 Free Spins are awarded, up to 55 total Free Spins. An additional special expanding symbol is chosen at random. If all 9 symbols are chosen to be special expanded symbols, no more free spins are awarded.

The game also features an optional Gamble round that provides an opportunity to multiply the total prize on any spin by correctly guessing the color or suit of a hidden card. The Gamble round can be played up to five times in a row.

Casino Standard Rules and Settings

WIN CALCULATION AND BETS:

- 1) Maximum wins are inclusive of the origin bet and based on the default bets for games
- 2) Underlined and bold values are default settings
- 3) Default settings can be changed by the operator
- 4) If the default settings/bets are altered, the maximum wins will be altered as well

CURRENCY:

- 1) All currency values relate to a currency multiplier of 1 which is accurate for EUR, USD, and GBP.
- 2) Other currencies, another multiplier might be used. For example: SEK has currency multiplier 10. All values related to currency should thus be multiplied by 10 for SEK. I.e. 10€ = \$10 = £10 = SEK100.
- 3) All currency is marked with an asterisk (*) next to the caption in all tables.
