## HOW TO PLAY?

The player chooses their bet amount using the + and – buttons. All wins are multiplied by the bet. For details on win payouts see the game paytable.

To play the game, the player presses the SPIN BUTTON. If playing on PC and if enabled in the game options menu, the space bar can also be used to spin the reels.

Winning symbols are raised over the reels when the spin stops.

Wins pay from left to right.

## GIGABLOX

#### HOW TO CALCULATE A WIN WITH 46,656 WAYS

If any of the reels contain more than 1 instance of a symbol, the win will be multiplied.

Multiply the number of symbols on each of the reels to get the final payout multiplier.

For example, if the first reel contains 2 symbols, second reel 3 symbols and third reel 2 symbols, the payable value is multiplied by  $2 \times 3 \times 2 = 12$ .

#### AUTOPLAY

Autoplay allows the player to play without pressing spin. To open Autoplay, press the AUTOPLAY button (the small button with 4 arrows and a play icon in the middle).

The player can choose the number of spins, loss limit, and single win limit. The spins will automatically stop when the chosen number is reached or when the loss limit or single win limit is hit.

When Autoplay is active, the AUTOPLAY button becomes a STOP button which displays the number of remaining spins. Press the STOP button to stop Autoplay spins.
