

GAME OVERVIEW

# HOT PEPPER!™

# Game Description

Spicy cluster wins await in Hot Pepper™.

Played across a 7×7 set of reels, Hot Pepper™ is filled with chili symbols that must have five or more matching adjacent symbols to award a win. These are then removed from play, triggering a tumble feature where new symbols replace winning ones and allow for additional wins to be made.

Every cluster win leaves behind a random wild, with a multiplier in one of the tumbling positions. Furthermore, a level-up feature can increase the multiplier that can be attached to these wilds, further increasing the thrills that this slot has to offer.

In the bonus round, players are boosted to the maximum level of five out of five, allowing for bigger wins to take place. There is also a wild creation feature that can award wilds during play, and these are key to unlocking the title's fiery max win worth 10,000x!

## RANDOM WILD MULTIPLIER FEATURE

Whenever a cluster of symbols hits and explodes it will leave behind a WILD symbol, in a random empty spot.

These are WILD symbols and substitute for all symbols except for BONUS.

Every time at least one winning cluster appears a progressive feature is triggered for the subsequent tumble sequence as follows:

First a random level from 1 to 5 is selected to start with. Any WILD generated by a winning cluster will carry a multiplier depending on the current level of the progressive feature. For every 3 WILDS that are used during the tumble sequence the level increases, up to maximum level 5.

WILDS come with a multiplier, that applies to the win of all clusters it is part of, depending on the number of symbols in the cluster that generated it as follows:

In level 1, clusters of 5 and 6 symbols generate a multiplier of x1, clusters of 7 and 8 symbol generate a multiplier of x2, clusters of 9 and 10 symbols generate a multiplier of x4 and clusters of 11 and more symbols generate a multiplier of x8.

In level 2, clusters of 5 and 6 symbols generate a multiplier of x2, clusters of 7 and 8 symbol generate a multiplier of x4, clusters of 9 and 10 symbols generate a multiplier of x8 and clusters of 11 and more symbols generate a multiplier of x16.

In level 3, clusters of 5 and 6 symbols generate a multiplier of x4, clusters of 7 and 8 symbol generate a multiplier of x8, clusters of 9 and 10 symbols generate a multiplier of x16 and clusters of 11 and more symbols generate a multiplier of x32.

In level 4, clusters of 5 and 6 symbols generate a multiplier of x8, clusters of 7 and 8 symbol generate a multiplier of x16, clusters of 9 and 10 symbols generate a multiplier of x32 and clusters of 11 and more symbols generate a multiplier of x64.

In level 5, clusters of 5 and 6 symbols generate a multiplier of x16, clusters of 7 and 8 symbol generate a multiplier of x32, clusters of 9 and 10 symbols generate a multiplier of x64 and clusters of 11 and more symbols generate a multiplier of x128.

If more than one WILD is present in a winning cluster, their multipliers add to each other.

If the same WILD is part of more than one winning cluster, its multiplier will apply to the win of all clusters it is part of.

All progress is reset at the end of all tumbles resulted from the same spin.

## FREE SPINS
