

CRYPTO MARKET

A fast-paced prediction game where players bet on the price movement of a simulated asset.

GAME OVERVIEW

Crypto Market brings the thrill of live trading to your casino lobby — with none of the complexity. Every round, a simulated asset chart moves in real time and players simply predict the direction: **Up or Down**.

Quick rounds, a transparent 99% RTP and a familiar market feel keep players engaged session after session.

HOW IT WORKS

- **Betting Phase** — players place their bet and pick a side: Up or Down. Live counters show how many players are on each side and the total bet pool.
- **Trading Session** — the chart goes live and the price moves. When the session closes, players who called the direction correctly win the multiplier shown for that round.

KEY FEATURES

Simple up / Down betting

One decision per round — instantly understandable for any player.

Live market-style chart

Real-time price action recreates the excitement of trading.

Round-by-round multipliers

Visible odds history builds anticipation and strategy.

Social gameplay

Player counts and shared bet pools create a live-crowd feel.

Rebet & quick chips

One-tap repeat bets keep the pace high between rounds.

99% RTP

One of the most player-friendly returns on the market.

GAME SPECIFICATIONS

Game type	Prediction / Crash
RTP	99%
Bet limits	0.10 – 2,500 USD
Max win	4 925,25 USD
