

Burning Fortunator

Video slot game

96.15 RTP %

Overview

“Burning Fortunator” is the latest “Burning” installment in the “Fortunator” series by Playson.

The game takes a classical slot machine approach with 5 lines, 3x3 grid and no over-complicating features. The goal is simple – spin to win, match the symbols on the pay lines to get large payouts.

With every win, the reels and the symbols are infused in flames – not threatening, but tempting, welcoming players to play more and discover the flaming theme of the game.

Game Theme and Graphics

“Burning Fortunator” being a successor in “Fortunator” series follows its theme of royal gems, with addition of classical video slot symbols.

What really brings the game to life is its stunning fire effects. Exceptional work was done to capture the coziness and at the same time fiery feeling of the flames to keep players on the edge of their seats when playing. The game provides a reimagined “Burning” experience and is truly immersive in its blazing feeling and gameplay.

Big Win salutes with the eruption of golden Fortunator coins and epic music.

Game screen

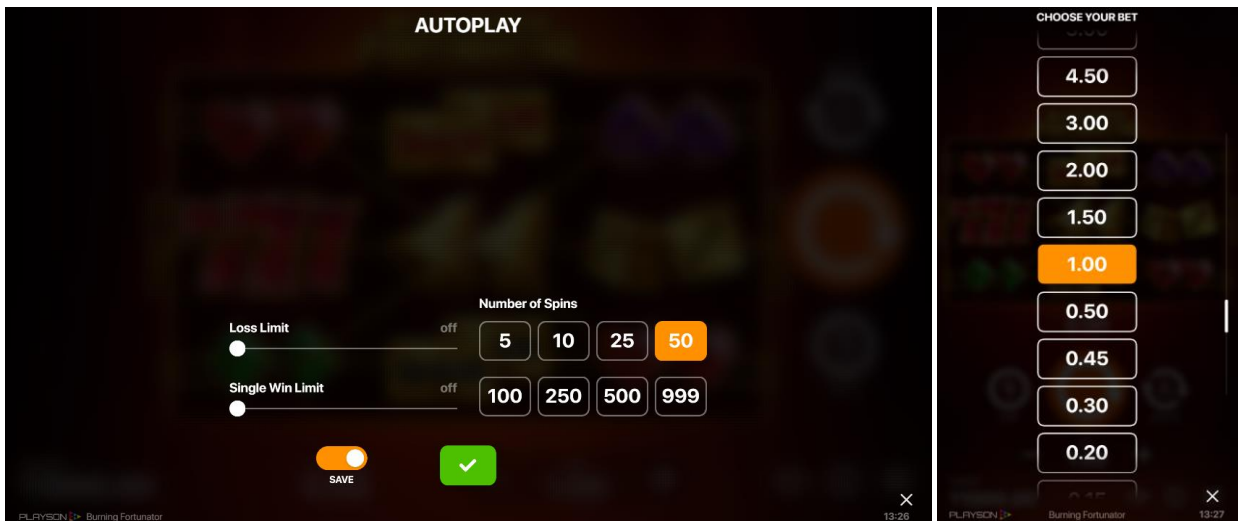

The screen footprint of the game display is 1280x720 pixels and comprises of two main elements – video display area and game panel.

Video display area

The reels are displayed in this area.

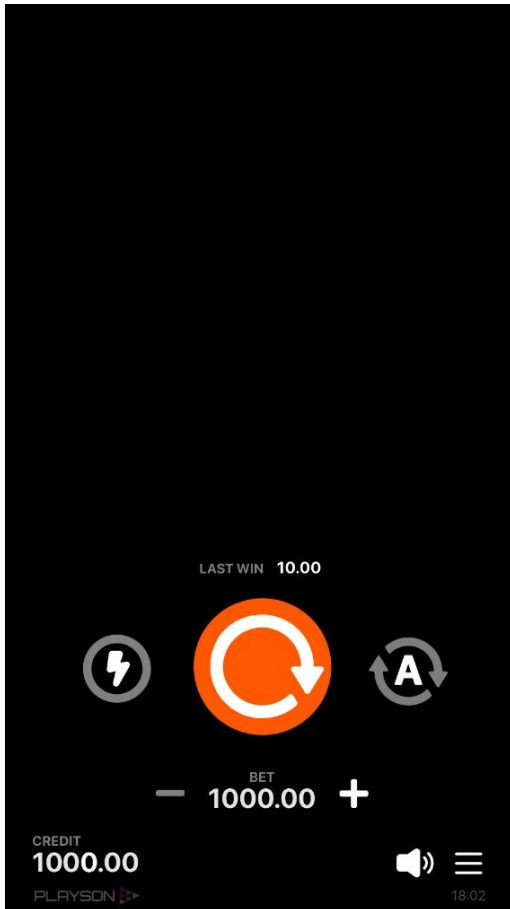

When the “Bet Menu” () , “Autoplay settings” () , “Game Menu” () are opened, the video display area is fully replaced. By clicking “X” () button the player can come back to the reel display.

Game panel

The game panel is located at the bottom of the reels for desktop version and for mobile version [portrait]. For the mobile version [landscape] the game panel is located at the right and the bottom side of the reels. It displays the available amount of credits on the player's account as well as bet and winning information.

Mobile version [portrait]

Mobile version [landscape]

Desktop version

	x3	75	15.00
	x3	35	7.00

Payout information in Pay Table is already displayed in the exact money value according to the player's bet.

Randomization

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Quantis, physical random number generator exploiting an elementary quantum optics process. Quantis has been evaluated and certified by the Swiss Federal Office of Metrology (also known as METAS), the Swiss national organization in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on <http://www.idquantique.com>.

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format <http://marketing.idquantique.com/acton/attachment/11868/f-0117/1/-/-/-/-/Quantis%20Certifications%20Collection.pdf>.

Quantis has also been approved by national authorities and can be used for gaming applications.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

Information to the Player

Players have access to game rules from within the game at all times.
