About Red Tiger Jackpots

Like all Red Tiger slots, Narcos Mexico Slot may be taken with or without Red Tiger jackpots. If a jackpot version of the base game is taken, it must be paired with a jackpot contribution to get the final overall RTP of the game. For example pairing the with-jackpot base game certified at 94.72% RTP and adding a 1% jackpot contribution gives an overall RTP of 95.72%. The RTP of the jackpot contribution itself is 100%.

FEATURES IN THE GAME

SUPPLY DROP

Look to the skies for a supply drop of Wilds. At random during the game, an airplane passes above the reels and drops packages that then become Wilds. They substitute for all paying symbols and can only land on reels 2, 3 and 4.

DOUBLE CASH

Make the call, double it and keep spinning! After a winning spin, the amount won in the current spin will be randomly doubled after the Win Ways.

FEATURES IN THE GAME

CARTEL SPINS

Take on the Cartel with Cartel Spins. Triggered by three Cartel Spins scatters, it all begins with the 2x2 Cartel Leader Super Tiles locked in the 4 corners of the slot. Each Cartel Leader will have a territory that expands when Mystery Territory symbols land adjacent to a leader or Marked Territory symbol. Each Marked Territory symbol will increase the global stake multiplier by the amount displayed on the symbol, and the maximum possible total multiplier is 10,500x. Only Mystery Territory, the Phone and the Plane symbols are able to appear on the reels during this feature.

FEATURES IN THE GAME

MYSTERY TERRITORY SYMBOL

Let the mystery begin! Mystery Territory symbols that land adjacent to a Cartel Leader become Marked Territory symbols of the Leader's colour. They stay locked for the duration of the bonus round and expand his territory. All coloured Territory symbols display an initial multiplier between 1x and 5x that contributes to the total win multiplier, and this is paid out at the end of the bonus round.

FEATURES IN THE GAME

CARTEL WAR

The battle is on and the bullets are gonna fly! When Mystery Territory symbols land adjacent to two or more rival territories, a Cartel War is triggered. The Leader with the biggest territory wins the clash and acquires the territory of the rival Leader. The size of a Cartel Leader's territory is determined by the number of locked Marked Territory symbols of the corresponding leader's colour. The Cartel Leaders themselves contribute to their respective territories, and as 2x2 symbols they count as 4 territory symbols overall, and the total value of a Leader's territory is displayed on the leader during the Cartel War. If the clashing Leaders have territories of the same size, the winner is determined randomly.
