DIVE IN FOR SUNKEN TREASURE

Deep Descent keeps it light this summer with a game that oozes tranquility and ease. Players search for under-water treasure in three crystal blue environments - the deeper the descent, the greater the rewards.

The good times keep rolling in Deep Descent, with wilds awarding re-spins and locking in place for wins that make a splash. In every spin, a random low value symbol will be selected as collectable. Each time it appears in a winning combination it's added to the collection meter that fills up to take divers deeper, where an additional row of symbols together with a wild symbol will be added. They'll need 21 collection symbols to venture into level 3 where yet another row of symbols are unlocked, along with a new wild symbol; this adventure just got a lot more interesting.

The search is on! Dive in for sunken treasure.

SUPER WIN (PROBABILITY)
(bet multiplier 60+)
1 in 338

BIG WIN (PROBABILITY)
(bet multiplier 15+)
1 in 89

FEATURES

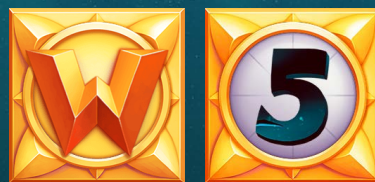

RE-SPIN GAME RULES

Every game round starts with 5 columns and 3 rows. Landing a wild symbol triggers respins. As long as at least one wild symbol is present on the board, respins continue. Landing a wild symbol reveals a number between 2 and 5 on top of the wild symbol. At the start of every spin, this number is decreased by one. The wild symbol sticks in place until the number is 0.

The collection meter persists throughout respins, and only resets at the start of a game round. Reaching at least 7 on the collection meter unlocks a fourth row below the rest, with a wild symbol with the number 4 being placed in the new row on reel 3. Reaching at least 21 on the collection meter unlocks a fifth row below the rest, with a wild symbol with the number 5 being placed in the new row on reel 3.

Respins can be triggered without landing a wild symbol in the base game, in case 7 or more of the collection symbol are included in a win. In such a case, the player is taken directly to the second respins level, with four rows being unlocked and a wild symbol on the bottom row.

Once a spin ends with no wild symbols present on the board and no new row being unlocked, respins end.

WILD RESPINS

The wild symbol substitutes for all symbols on the reels.

Landing a wild symbol awards Respins where the wild symbol will lock in place during the Respins. The number of Respins awarded will be determined by the number visible on the wild symbol.

COLLECTION

In every spin, a random low value symbol will be selected as collectable. The collectable symbols are collected if they are included in a winning combination and will increase the number in the collection meter.

DEEP DESCENT PROGRESSION

You start at Level 1 and there are in total 3 depth levels where the respins can be played out.

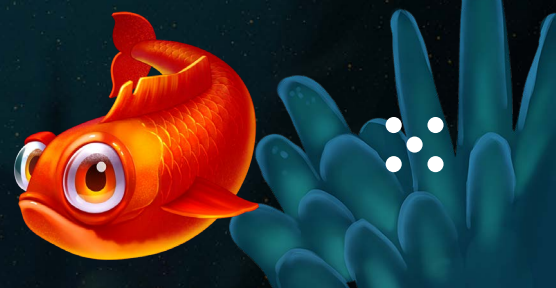

If 7 collection symbols are collected, you will descend to level 2, where an additional row of symbols together with a Wild symbol will be added.

If 21 collection symbols are collected, you will progress deeper down to level 3, where yet another row of symbols are added together with a new wild symbol.

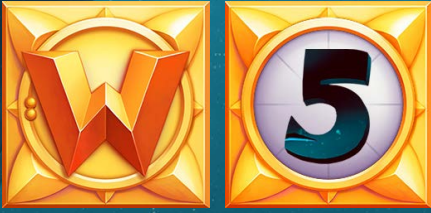

UP TO 3125 WAYS TO WIN

A win is created by matching symbols, regardless of vertical position, from left to right, starting on the leftmost reel.
