## A MAGICAL BACCARAT FILLED WITH GOLDEN CARDS

Golden Wealth Baccarat is a Baccarat where luck and wealth are spread in the form of golden stardust that delivers Golden Cards from a magical glowing pot. With frequent wins on multipliers, this is the 'luckier' version of Lightning Baccarat!

In Golden Wealth Baccarat, five randomly generated cards are selected each game round to be Golden Cards with associated multipliers, adding excitement and extra win potential. If the player is dealt a Golden Card, a multiplier will be visible on the table. If the player wins on a hand with one or more matching Golden Cards, the winnings are multiplied accordingly. Players can unlock several multipliers: 2x, 3x, 5x or 8x.

Golden Wealth Baccarat is presented in a stylish red and gold studio filled with lucky elements, where a magical glowing pot delivers wealth in the form of augmented-reality golden stardust and Golden Cards. This has also been beautifully replicated in the First Person RNG-based version of the game.

Golden Wealth Baccarat is suitable for both entry-level players seeking a fun and engaging gaming experience, and experienced players who want to enjoy a well-made version of the classic card game. Entertaining and stylish, Golden Wealth Baccarat is a truly beautiful and incredibly exciting version of Baccarat!

## HOW TO PLAY

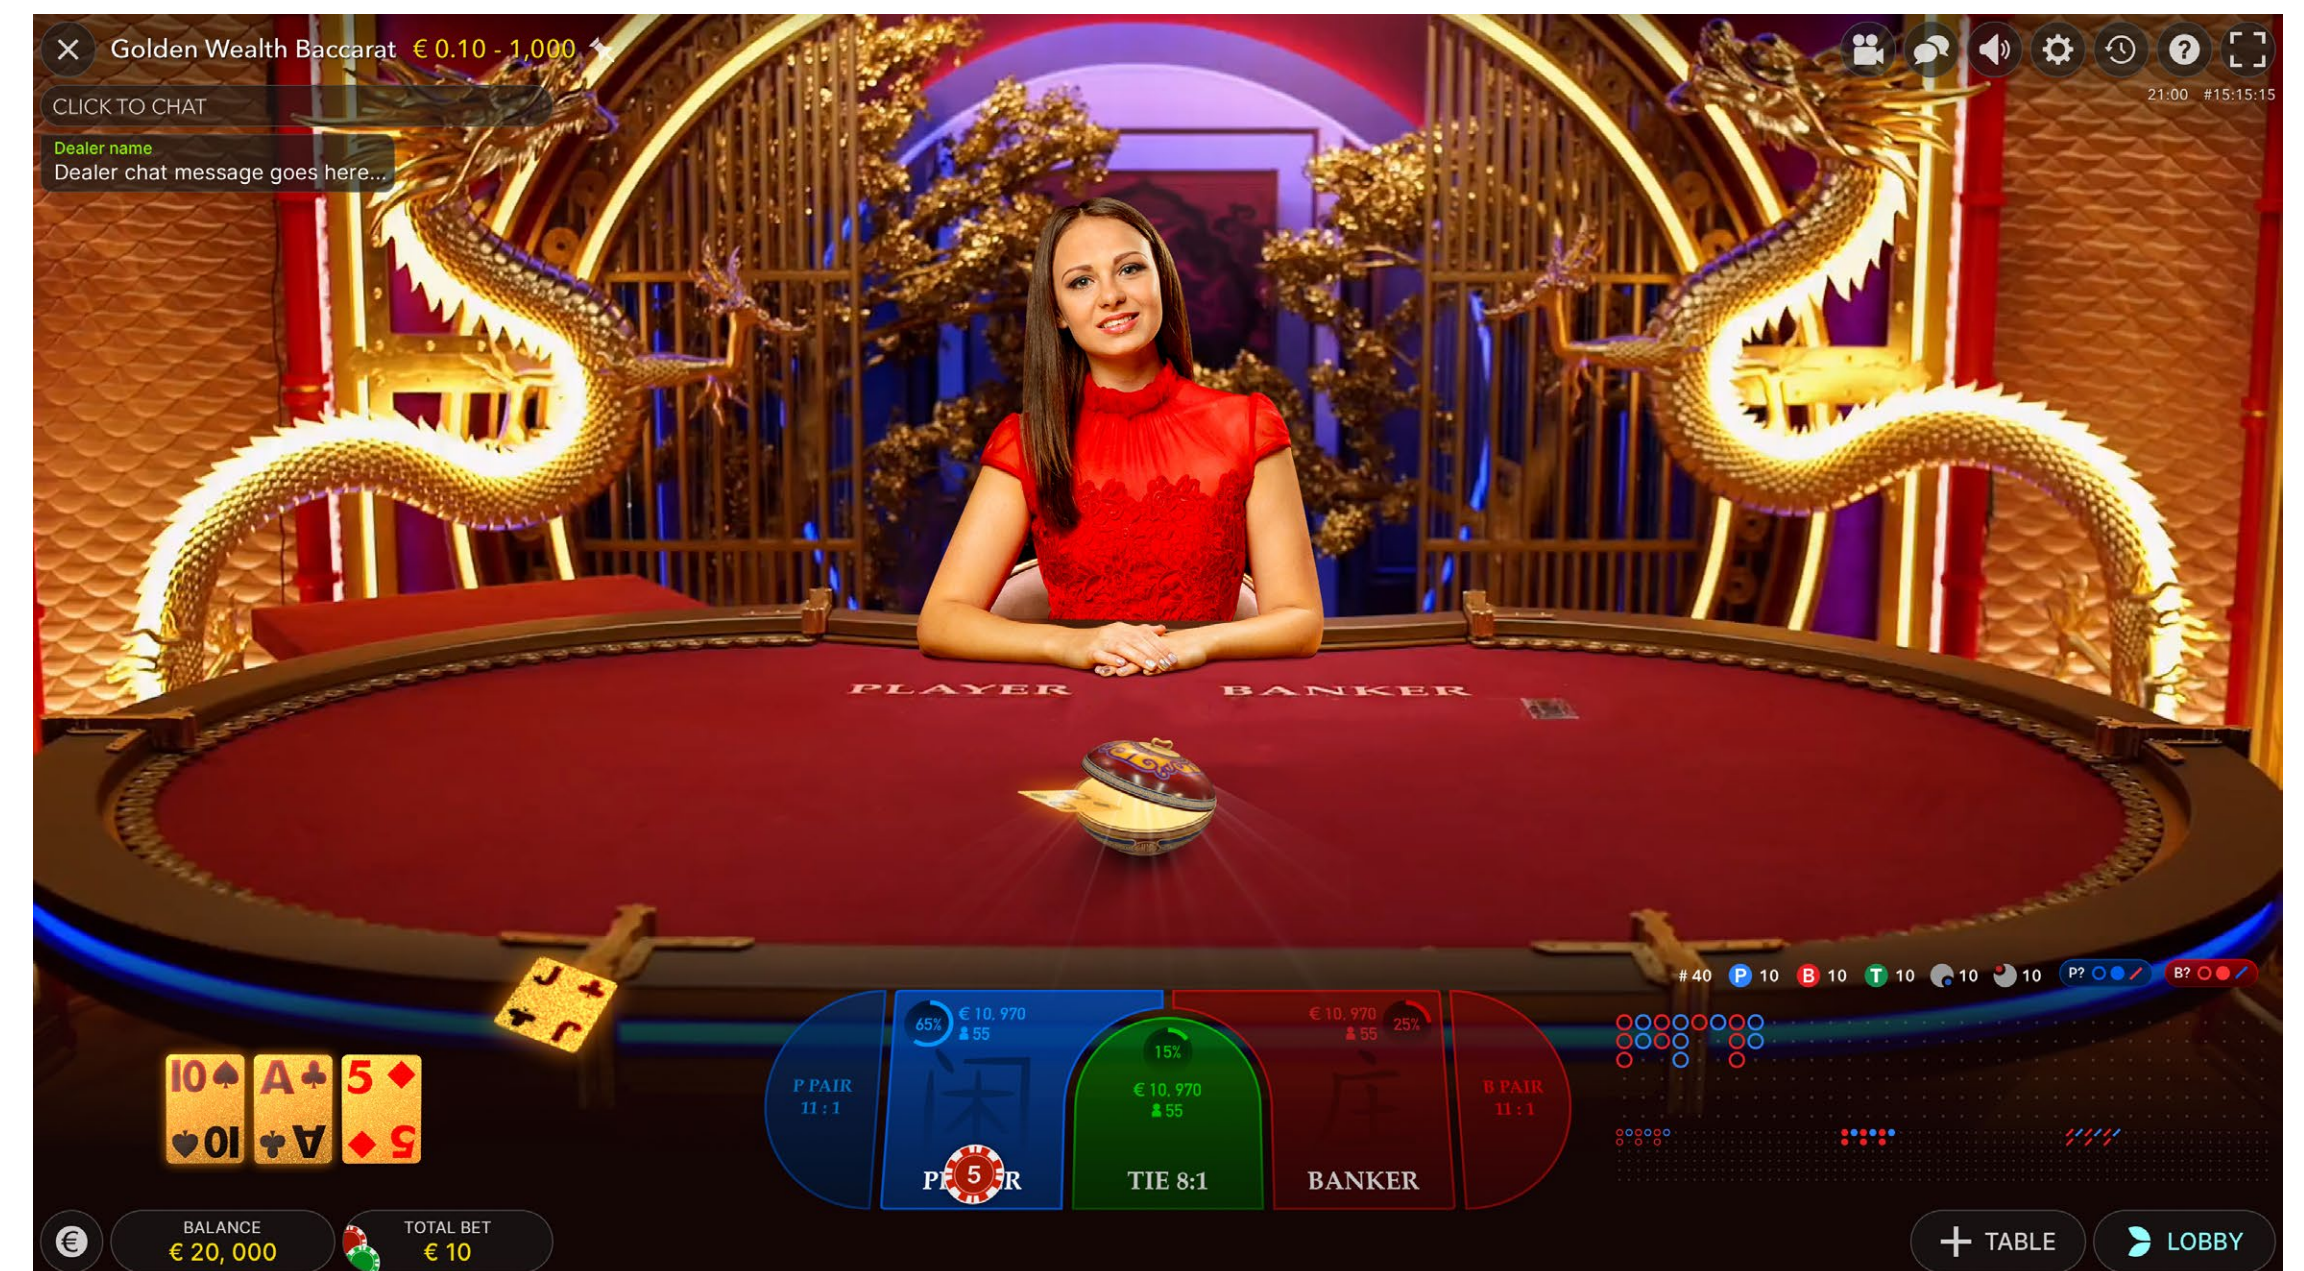

Golden Wealth Baccarat combines our world-class Live Baccarat with a chance for players to win big, multiplied payouts on their winning hand, just like in Lightning Baccarat. The main difference is that players will discover that they are more 'lucky' in this version, with the low-volatility gameplay resulting in more multiplied wins.

### THE BETTING PHASE

Prior to each deal, the player can wager on whether the Player's hand or the Banker's hand will win. The hand that's closest to 9 wins. The player also has the option to wager on a Tie (i.e. both the Banker's and the Player's hands will total the same). Players will see two additional betting spots – Player Pair and Banker Pair. These allow the player to bet on either the Player's or the Banker's first two cards being a Pair. No further side bets are available. A 20% Golden Fee is added to each player's total bet, and this is visible in the user interface.

### THE GOLDEN ROUND

After the betting time has expired, the Golden Round starts. Each Golden Round always features five randomly generated Golden Cards from a virtual 52-card deck, plus randomly generated payout multipliers for each Golden Card. The Golden Cards with multipliers are returned to the players from the Magical Pot in exchange for the Golden Fee.

## THE DEAL

After the Golden round, the Player and Banker are dealt two or three cards depending on the value of their hands according to standard Baccarat rules. During dealing, Golden Cards are highlighted in the user interface if a matching card has been dealt, to make the player aware of a potential multiplied payout.

## GAME OUTCOME

If the player has placed a bet on a winning hand, the payout will be according to the payout table. If the player's winning hand contains one matching Golden Card, the winnings will be multiplied accordingly (i.e. 2x, 3x, 5x or 8x).

If the player has more than one matching Golden Card in the winning hand, the winnings are multiplied again. For example, with three matching Golden Cards, the total winnings could be multiplied by as much as 8x8x8 (512x). A winning bet on a Tie with six matching Golden Cards can result in a multiplier of 262,144x. All winnings are capped to €500,000 plus bet.

The player must have the matching Golden Card/s in their winning hand to receive a multiplied payout.
