

AZTEC GOLD MINES

About

Venture deep into the jungle to go in search of the lucrative golden Win Multipliers while avoiding the dreaded Montezuma Mines - welcome to Aztec Gold Mines. Aztec Gold Mines is iSoftbet's second "mines" release - a simple pick & click game where the aim is to find the golden squares to increase the Win Multiplier, while at the same time making sure to avoid the Montezuma Mines, which will lose the accumulated prize and end the game round. The more successful picks you make, the higher the Win Multiplier will go, but gold squares are harder to find, while the Mines are more likely to steal all your hard earned cash. Paying homage to one of our most popular ever slots, Aztec Gold, this new Mines release is an exciting, fast-paced gaming experience, where the player can control the volatility and feel of the game by choosing their own settings, from bet size to the number of Mines contained within the grid - the more starting Mines on the grid, the faster the Win Multipliers will grow, but the Mines are also harder to avoid, making for a high octane thrill ride with each subsequent pick. Aztec Gold Mines brings together the much-loved design and theme of the original slot, while also offering a whole new style of game play perfectly suited to the modern online player, with increasing excitement during every round and the opportunity to Cash Out at any stage. Due for global release in mid 2022, Aztec Gold Mines looks sure to be another successful title in our growing games portfolio and would be an exciting addition to any online casino.

STATS

RTP RANGES + STRATEGY (RTP: 96.00% - 98.88%)
1 MINE: Min 96.00% (5, 9, 10, 13, 15, 17, 19, 20, 21, 22, 23, 24 picks) / Max 98.88% (1 pick)
2 MINES: Min 96.00% (9, 15, 16, 19, 20, 21, 22, 23 picks) / Max 97.52% (1 pick)

Shows the value of the next Win Multiplier if you choose to continue the round.

PAYOUTS

The payout for the game is determined by a bet multiplier which increases after each winning pick. The bet multiplier is dependent on the number of Win Multipliers found and the number of Mines. The current grid set-up always represents the true probability of picking a Win Multiplier or a Mine.

GAME OVERVIEW

Aztec Gold Mines is played on a 5 x 5 grid, consisting of 25 squares. Behind each square is either a gold Win Multiplier or a Montezuma Mine. Uncover Win Multipliers to increase your prize - you can choose to cash out after a successful pick. If you find a Montezuma Mine, you will lose your accumulated prize and the game round is over. The more gold Win Multipliers you find, the bigger the rewards.

AZTEC GOLD MINES

Game Features

HOW TO PLAY

At the start of the game, choose your bet size and the number of Montezuma Mines. You can choose 1, 2, 3, 5, 7, 10 or 15 Mines. The more mines you choose, the faster your winnings can grow - but gold squares are harder to find. Press PLAY to start and choose a square to uncover. Each gold Win Multiplier found will increase your prize, a Montezuma Mine will end the game round.

CASH OUT

Certified Markets

EUROPE

-  Czech Republic
-  Denmark
-  Estonia
-  Greece
-  Hungary

Shows the current value of your prize, which you can choose to collect (Cash Out). After a Win Multiplier is found, this value will increase and you can Cash Out after any correct pick.

REMAINING PICKS

Shows the number of remaining picks you are allowed to make. Depending on the number of Mines, you will have a set number of initial picks available. After each Win Multiplier is found, the number of remaining picks will count down by one. If remaining picks run out, you will have reached the Maximum Win.

MAXIMUM WIN

Shows the maximum possible win you can reach with the current grid. Maximum Win is dependent on the initial bet and the number of starting Mines. If Maximum Win is reached, no more picks are available and you must CASH OUT.
