# Game rules

Welcome to Of Sabers and Monsters Video Slot with 2 Free Spin modes, Hero battles, Ardent Respins and more wonderful features.

## ABOUT THE GAME

Of Sabers and Monsters is a Video Slot with 6 reels, 4 rows and 4096 ways from the left. The game has 4 High symbols and 4 low symbols that win if three or more are lined up on a payline, beginning from the leftmost position. The Wild symbol substitutes for all regular symbols. There is also a feather symbol that only lands on the 6th reel.

## Hero Battles

All Heroes that land on the reels 2,3,4 and 5 will fight the Monster in all non-base-game modes. If they win the fight, they will turn into a sticky Wild for the remaining feature spins. If they lose the fight, they land as regular high symbols. Heroes which are in Ardent mode always win their fight.

## Ardent Respins

Each Hero has a focus meter in the base game. Collecting 100 focus points triggers that Hero's Ardent Respins. 1 point is collected from a 3-of-a-kind win, 2 points are collected from a 4-of-a-kind win, 3 points are collected from a 5-of-a-kind win and 5 points are collected from a 6-of-a-kind win. The Hero that triggers the Respins will be in Ardent mode for the entire Respin round (meaning

they always win their battle). The Respins end when there are no battles won or if all the reels are filled with sticky Wilds. All new players will get 50 free focus points on 1 Hero. Ardent Respins are played with the average bet size of all bet sizes used when focus points were collected.

## Free Spins

Land 3+ Free Spin symbols anywhere on the reels to trigger Free Spins. Before the Free Spin round begins, a bonus game is triggered where the player can get up to 1 extra bonus. Heroes fight the Golden Monster each time they land on the reels and if they win the fight, they become sticky Wilds for the remaining Free Spins. Free Spin symbols only appear in the base game. Free Spins are played with the same lines and bet size as the activating spin.

## HOW TO CALCULATE WINS WITH WAYS

To calculate the total Ways win, add all the symbol wins together.

To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the left.

If the number of consecutive reels containing the symbol is 3 or greater counting from the left, find the corresponding win amount in the dynamic paytable.

If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example: if the first reel contains 2 symbols, the second reel has 3 symbols and the third reel has 2 symbols, the total multiplier is counted as follows:  $2*3*2=12$  (total multiplier).

The above doesn't include any Free Spin symbols which pay scattered.

Way Wins are summed together after the spin.
