AZTEC WILDS MEGAWAYS™

The six-reel, two to seven-row video slot boasts a formidable **117,649 winning ways**, and not to mention its host of titular wilds. Aztec Wilds Megaways is a highly colourful game, and its wilds are no exception. These symbols, appearing in the base game and during freespins provide even bigger win opportunities. During freespins, the wilds include multipliers. In fact, **Sticky Wilds** and the **Aztec Wild** itself only land during **freespins**, the former with a multiplier that increases with tumbles, and the latter which can expand out onto the reels.

THE WILD:
The Wild appears in the base game and freespins, slotting into any winning way, as well as increasing the multiplier during freespins.

THE STICKY WILD:
The Sticky Wild appears during freespins, and has its own multiplier that increases with every tumble it causes, while also sticking on the board.

THE AZTEC WILD:
The Aztec Wild itself lands in freespins, can reproduce itself across the reels, and contributes further multipliers to other wilds.
