Game Theme and Graphics

"5 Fortunator" is shiny and colorful video slot that looks luxurious and brings riches. The main feature of the game is the expanding Wild symbol which is drawn as royal crown. It appears as a stand-alone symbol, but if there is a chance to compose a winning combination it expands to cover the whole reel.

Some symbols are drawn as precious stones that remind card suits: hearts, spades, diamonds and clubs, while others are shown as golden items – bells, dices and bars. Symbols that stand out and pay the most are majestic Stars and Sevens. Sevens are bloody red and inlaid in golden frames, while star Scatters are bright as real stars that have just fallen from the sky and have gold and diamond texture. Each symbol has unique animation that starts whenever it is a part of a winning combination. Big Win animations attract all attention with bursting golden coins.
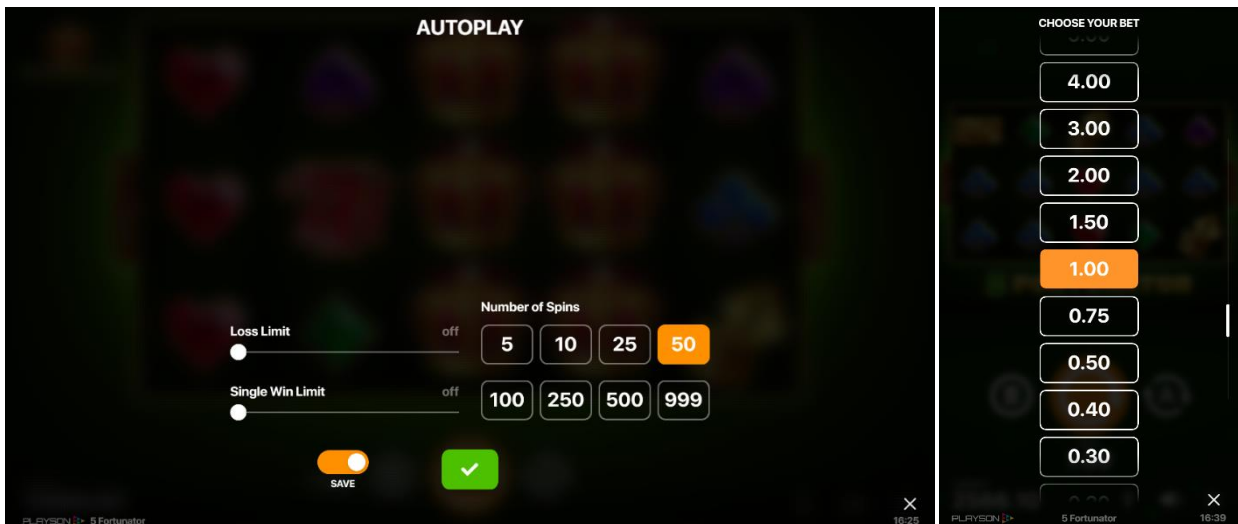

Game screen

The screen footprint of the game display is 1280x720 pixels and comprises of two main elements – video display area and game panel.

Video display area

The reels are displayed in this area.

When the "Bet Menu" (⊜), "Autoplay settings" (⊛), "Game Menu" (≡) are opened, the video display area is fully replaced. By clicking "X" (✕) button the player can come back to the reel display.
Game panel

The game panel is located at the bottom of the reels for desktop version and for mobile version [portrait]. For the mobile version [landscape] the game panel is located at the right and the bottom side of the reels. It displays the available amount of credits on the player's account as well as bet and winning information.

Mobile version [portrait]

Mobile version [landscape]

Desktop version

Game panel also includes game controls where the player can do the following:

Pay Table

Symbol	Combination	Coefficient in Line Bets	Winning amount if the bet = 1€
	-	-	-
	x5 x4 x3	100*Total Bets 20*Total Bets 3*Total Bets	100.00 20.00 3.00
	x3	20*Total Bets	20.00
	x5 x4 x3 x2	2000 200 40 10	400.00 40.00 8.00 2.00
	x5 x4 x3	500 100 30	100.00 20.00 6.00
	x5 x4 x3	200 50 20	40.00 10.00 4.00
	x5 x4 x3	100 25 10	20.00 5.00 2.00

Payout information in Pay Table is already displayed in the exact money value according to the player's bet.

Randomization

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Quantis, physical random number generator exploiting an elementary quantum optics process. Quantis has been evaluated and certified by the Swiss Federal Office of Metrology (also known as METAS), the Swiss national organization in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on http://www.idquantique.com.

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format http://marketing.idquantique.com/acton/attachment/11868/f-0117/1/-/-/-/-/Quantis%20Certifications%20Collection.pdf.

Quantis has also been approved by national authorities and can be used for gaming applications.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

Information to the Player

Players have access to game rules from within the game at all times.
