About Aviatrix Mines

Aviatrix Mines is an instant win game in the Aviatrix metaverse that blends classic mines gameplay with AAA visuals, aircraft progression, and shared meta-features. At its core, the game delivers strategic risk-and-reward action on a 5x5 grid, where each revealed cell increases the potential payout — but a single mine ends the round.

The experience is elevated by the player's own customized plane displayed above the grid, making every move feel personal — their aircraft, their strategy, their stake in the metaverse — turning each choice into part of a bigger connected world.

-  Classic 5x5 grid gameplay with adjustable mine count delivers the strategic risk-and-reward experience for players.
-  A customised aircraft displayed above the grid makes every reveal personal and connects the game to the player's journey.
-  Progress is shared between Aviatrix Mines and the wider Aviatrix game portfolio, keeping players engaged in one unified ecosystem.

Game rules

Aviatrix Mines is an instant win game where players reveal cells on a grid while avoiding hidden mines created in signature Aviatrix design style.

This is a 5x5 grid-based game with a configurable number of mines set before each round.

Each round begins with all cells concealed and the player selecting their bet and mine count.

Revealing a safe cell increases the current payout multiplier.

Each successful reveal builds the potential win, which can be collected at any time.

Revealing a mine ends the round immediately and results in a loss.

All payouts are calculated based on the current multiplier and the player's bet amount.

NEW ERA IN IGAMING

Diverse Games. One Unified Experience.

Meta features connect every game in the Aviatrrix portfolio, creating a seamless player journey. Loyalty, rewards, and progression travel across titles, boosting engagement and value for operators.

Meta features

One players profile

Stats, achievements and history follow the player across every Aviatrix title, so their progress always feels connected, not reset.

One loyalty program

Players earn and use the same points, bonuses and perks across the whole experience, turning separate games into one shared journey.

One progress

Level-ups and milestones are unified, so time spent anywhere in the metaverse builds one clear sense of progress.

Shared Bonuses

Bonuses earned across the metaverse follow players into every Aviatrix game they play.

In-game Lobby

Available in each game, the lobby lets players seamlessly navigate across titles in the Aviatrix metaverse.

One Leaderboard

One shared leaderboard shows player rankings across the entire Aviatrix metaverse.

Planes level-ups and skins

8 levels of aircraft in Aviatrix level up with experience points earned from turnover. A variety of skins with different rarities give players a new level of personalization & engagement.

Loot boxes

Open to reveal guaranteed prizes — from rare skins to XP and free bets.

Built-in free bets & promo codes

Natively built in-game, accessible via API. Can be activated with built-in Promo Codes.

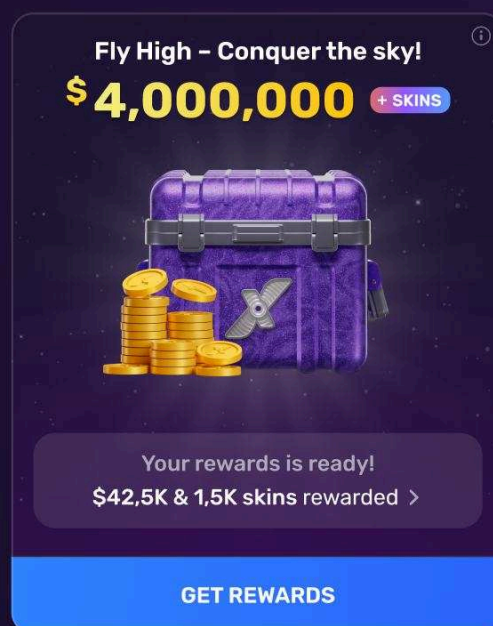

Loyalty program

All customized planes can participate in network tournaments with daily rewards.

Daily tournament rewards consist of two parts:

Cashback rewards. The large prize pool is distributed as daily rewards among the players.

Loot boxes. Players earn loot boxes through their activity and can open them to reveal rare skins, free bets, or valuable plane XP.

Cashback rewards

To participate in a daily tournament, the user must meet the following requirements:

- Has made at least one bet with an aircraft in the last 24 hours.
- Has already claimed a reward from the previous tournament.

Daily cashback rewards has 2 stages:

Stage 1

Only 25% of eligible aircraft can win the daily tournament. The likelihood of being among that 25% will depend on the number of bets the user made using their airplane within the previous 24 hours. The higher the amount, the greater the chances of winning.

Every 24 hours, the minimum turnover provided by one of the airplanes equals one chance. The chances of all other participating airplanes are proportional to this minimum turnover.

Airplane	Turnover, EUR	Number of chances
Airplane 1	0.5	1
Airplane 2	2	4
Airplane 3	5	10
Airplane 4	8	16

In the example above, we used 4 airplanes. Therefore, there will only be 1 winner (25% of all the airplanes who made bets during the day get to the 2nd stage). Plane number 4 will have 16x more chances to get to the second stage than plane number 1.

One airplane can participate in the tournament, once a day. A player can participate in the rewards distribution with any number of their planes.

Stage 2

When a plane wins the daily tournament the amount of those winnings will depend on its overall game experience earned over the past six months. The more experienced an aircraft is, the larger their reward will be.

Tournament influence research

<p>10x</p> <p>GGR Impact Return Rate</p>	<p>4x</p> <p>Player return probability</p>
---	---

Players who receive daily rewards typically generate up to 10x more GGR within the same day than the value of the reward itself.

Reward program also significantly enhance engagement – increasing player return rates by up to 4x and reducing churn.

Loot boxes

Loot boxes add a thrill of discovery, offering a chance to unlock exclusive rewards just by playing. Players earn loot boxes through their activity, then open them to reveal **rare skins, free bets, or valuable plane XP**. With four levels of rarity and guaranteed prizes, every box brings anticipation and excitement. No purchase is required, just pure gameplay fun to collect, open and enjoy the rewards.

Based on the amount spent in the game in the last 24 hours, players qualify for:

Box	Milestone	Spent, €
 Classic	1	100
 Rare	2	1,000
 Epic	3	10,000
 Legendary	4	100,000
 Nx Legendary	N Repeatable	Nx 100,000
