## Gamble Wheel

Before playing Unlimited Free Spins, you have the option to gamble your Unlimited Free Spins. Winning the gamble gives you a higher starting multiplier and higher starting reels, losing the gamble takes you back to the base game without playing the Free Spins. You can gamble up to twice. Win one gamble to increase starting multiplier from x2 to x3 and reel height from 3 to 4. Win another gamble to increase the multiplier to x4 and reel height to 5. The gamble wheel can land on the special golden field that gives an x5 starting multiplier.

## Unlimited Free Spins

Unlimited Free Spins always have 3 spins. Whenever a spin is a win, the counter resets back to 3. Free Spins play out automatically and ends if the counter empties out (reaches 0) where the lights on the counter indicate the number of spins left. Free Spins start with an x2 multiplier. The progress of unlocking the reels in Free Spins does not fully reset between each spin. The progress is only reset down to the shortest reel.

## Multiplier

Free Spins begin with 2x Multiplier. Every new spin the Multiplier increases by 1. After unlocking all reels this raises to 2, so after unlocking all reels every new spin increases the Multiplier counter by 2. Multiplier is applied to every win.

## Popwins™

Winning symbols 'Pop' and 2 new symbols appear in their place. Each reel can reach a maximum of up to the 6 symbols in the base game and 9 in Free Spins. PopWins™ ends when there are no more wins in the panel. PopWins™ are played with the same bet as the base game.

## HOW TO CALCULATE WINS WITH “WIN ALL WAYS”

To calculate your total WIN ALL WAYS win, add all your symbol wins together

To calculate a single symbol win, count the number of subsequent reels that contain the symbol, starting from the left or the right

If the number of subsequent reels containing the symbol is three or greater counting from the left, find the corresponding win amount in the pay table

Otherwise, if the symbol was not present on three subsequent reels counting from the left, count from the right

If the number of subsequent reels containing the symbol is three or greater counting from the right, find the corresponding win amount in the pay table

If any of the reels contain more than 1 instance of the winning symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example, if the first reel contains 2 symbols, the second reel 3 symbols and the third reel 2 symbols, the pay table value is multiplied in the following manner:  $2*3*2=12$  (total multiplier)

5 of a kind wins only pay from one side

During gameplay, different way wins are added together
