Symbol Details

Wild

The Wild symbol can substitute for any other symbol, except for the Full Moon and Free Spin Bonus scatter symbols, to make the best possible winning combination.

There is also a separate payout for 3 or more Wild symbols on a payline, which will be paid out if this will result in a higher win than Wild substituting.

Full Moon Scatter

The Full Moon scatter symbol appears on reel 5 during the main game

only. When it appears, all Dr Blackwood symbols  currently on the reels are turned into Multiplier Wild symbols.

Multiplier Wild

The Multiplier Wild symbol can substitute for any other symbol except for the Full Moon and Free Spin Bonus scatter symbols, to make the best possible winning combination. In addition, line wins resulting from a combination in which the Multiplier Wild symbol participates are multiplied by the value shown on the symbol. The multiplier value awarded is random and can be from x1 to x5.

Free Spin Bonus Scatter

3, 4 or 5 Free Spin Bonus scatter symbols appearing simultaneously anywhere on the reels during the main game trigger the Night of the Full Moon Free Spins feature.

Stacked Symbol

The Dragon Jewel symbol  is stacked on all reels, appearing one above the other.

Game Features

Night of the Full Moon Free Spins

The Night of the Full Moon Free Spins feature is triggered when 3, 4 or 5 Free Spin Bonus scatter symbols appear simultaneously anywhere on the reels during the main game. Depending on the number of symbols triggering the feature, the player is awarded a different initial number of Free Spins and a different initial win multiplier:

Number of Free Spin symbols triggering Free Spins	Initial number of Free Spins awarded	Initial win multiplier value awarded
3	1	1
4	2	2
5	3	3

The reels will then transition to a graveyard where the player may pick graves to increase their amount of Free Spins and Free Spins win multiplier. Each grave will award either an additional number of Free Spins (from 1 to 4) or an additional win multiplier value (from x1 to x4), which are added to the initial values won. When a grave that the player has picked reveals "Collect" the Free Spins will begin with all accumulated prizes.

The highest number of Free Spins that can be won is 20. The highest win multiplier value is x5.

During the Free Spins the reels are spun automatically using the same bet per line as on the spin that won the feature. In Free Spins, all Dr Blackwood symbols act as Multiplier Wilds, multiplying line wins by up to x25. Wild multipliers are pre-calculated to account for the Free Spins multiplier.

Full Moon Feature

The Full Moon feature is available during the main game only. It is triggered when the Full Moon scatter symbol appears on any position on reel 5.

When the feature is triggered all Dr. Blackwood symbols currently on the reels will turn into Multiplier Wild symbols. The Multiplier Wilds will have a randomly assigned multiplier that will multiply wins they participate in by between x1 and x5. All Dr. Blackwood symbols on the reels when the feature is triggered will turn into the same Multiplier Wild (i.e. all Dr. Blackwood symbols will become x4 Wild Multipliers).

The game uses a maximum win capping. Maximum win capping is a system parameter defining the maximum exposure (player win) that the operator is willing to take from a single paid spin in the game. In case of a game win higher than the defined max win capping amount, the game will only pay out the defined max win capping amount. The default max win capping for the game in hand is €500,000.

Important notes:

- 1) Max Win Value should not be lower than 500,000 so as not to lower the RTP of the game
- 2) It is highly recommended that the Max Win Value is not greater than 2,500,000 so as not to expose the house to very big wins

It is highly inadvisable to change the Win Capping Values and game limits while the game is live and players are connected to the game.

Default Game Limits and Configuration

Overview

To control the level of exposure of any casino game, its limits must be studied and configured correctly, following the casino's exposure and risk policy. The default limits assigned by Playtech at the time of upload can be re-configured through the **Game Limits** page in the Casino Admin.

Casino operators must review the default limits of new games in the various supported currencies and re-configure them in the Casino Admin, according to their policy.

The limits can be viewed and modified when the casino is still in preview mode. This enables casino administrators to fine-tune the limit definitions before switching the games to production, thereby eliminating any possibility of unwanted exposure.

Game limits of all new games must ALWAYS be reviewed and, if necessary, adjusted by the casino operator prior to the game's release to production. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits.

Default Line Bet Values at Upload

At the time of upload, Playtech sets the maximum line bet to such a value that the maximum house exposure will be under €2,500,000 (2.5 million Euro) for games running on the casino server. Playtech will upload the game with the default line bet values below (note how the maximum line bet in the list is per Playtech exposure policy):
