## Game Theme and Graphics

Colour palette is simple but fresh and juicy with symbols getting the most of player attention as it should be. Here one can see a full basket of photorealistic fruits such as watermelon, grape, plum, cherry, lemon and orange. Other known compatriots are also here – bells and bars as symbols with highest payouts. And of course slot wouldn't be complete without Wild sevens and Scatter stars. All animations are shiny and full of fire to light up someone's big win night.

## Game screen

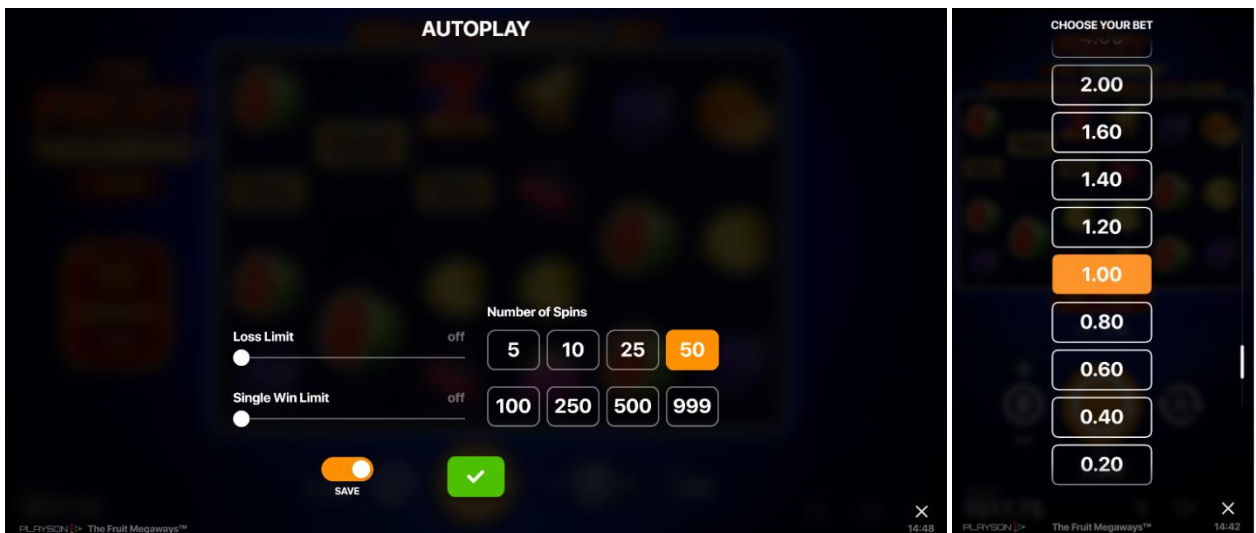

The screen footprint of the game display is 1280x720 pixels and comprises of two main elements – video display area and game panel.

## Video display area

The reels are displayed in this area.

When the “Bet Menu” () , “Autoplay settings” () , “Game Menu” () are opened, the video display area is fully replaced. By clicking “X” () button the player can come back to the reel display.

## Game panel

The game panel is located at the bottom of the reels for desktop version and for mobile version [portrait]. For the mobile version [landscape] the game panel is located at the right and the bottom side of the reels. It displays the available amount of credits on the player's account as well as bet and winning information.

## Pay Table

Symbol	Combination	Coefficient in Line Bets	Winning amount if the bet = 1€
	-	-	-
	x6 x5 x4 x3 x2	1000 200 100 40 20	50.00 10.00 5.00 2.00 1.00
	x6 x5 x4 x3	150 60 40 20	7.50 3.00 2.00 1.00
	x6 x5 x4 x3	100 50 25 15	5.00 2.50 1.25 0.75
	x6 x5 x4 x3	40 20 15 10	2.00 1.00 0.75 0.50
	x6 x5 x4 x3	25 18 12 6	1.25 0.90 0.60 0.30

Payout information in Pay Table is already displayed in the exact money value according to the player's bet.

## Randomization

### Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Quantis, physical random number generator exploiting an elementary quantum optics process. Quantis has been evaluated and certified by the Swiss Federal Office of Metrology (also known as METAS), the Swiss national organization in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on <http://www.idquantique.com>.

Quantis has also been evaluated by Compliance Testing Laboratory (Bangor, UK), which confirmed that it is "suitably unpredictable and fit for purpose". Download certificate in PDF format <http://marketing.idquantique.com/acton/attachment/11868/f-0117/1/-/-/-/-/Quantis%20Certifications%20Collection.pdf>.

Quantis has also been approved by national authorities and can be used for gaming applications.

## Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

## Information to the Player

Players have access to game rules from within the game at all times.

## Game Simulation
