

ROYAL POKER

Popular five card Poker variant

Royal Poker is a popular game in many European countries. It's an exciting new Poker variant to extend your Live Casino Poker offering.

Five cards are dealt to the dealer in the game and five cards to the player. The aim of the game for the player is to create a stronger Poker hand than the dealer. The player can change up to five cards to create one or two Poker combinations stronger than the dealer's hand.

The player may also buy a card for the dealer to ensure that the dealer qualifies if the player has a strong hand. Players are also offered insurance options for valuable combinations.
