HOW TO PLAY

Press the Spin button to start the game.

HOW TO CALCULATE PAYLINE WINS

To calculate your total payline win, calculate all payline wins and add them together.

To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.

If three or more identical symbols are lined up, find the win value in the Pay Table. There you can find the value for all symbols for 3, 4 and 5 in a row. Only the highest winning combination per line is paid out.

If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.

After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.
