GAME DESCRIPTION

CAN YOU HEAR IT RING? KA-CHING!

Big, small, green or brown. Coins or bills. Shinning or rustling. Money is the anthem of success. Grab your pennies, ponies, monkeys and spin the reels to ring the sound of big wins in this money-making game. The more you bet, the more you earn as your winnings increase with each respin up to 5x multiplier.

GAME FEATURES

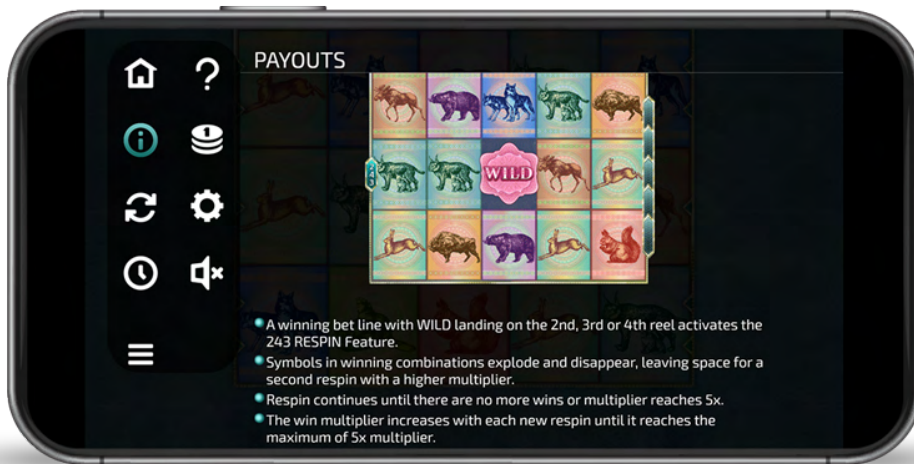

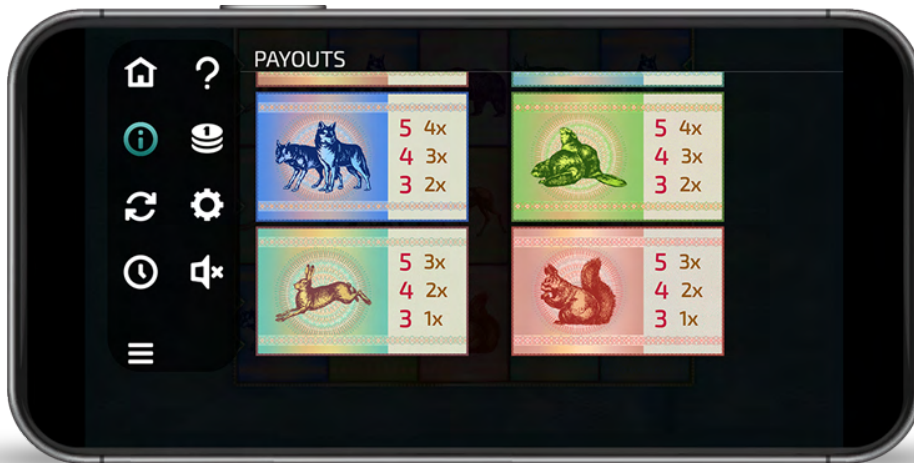

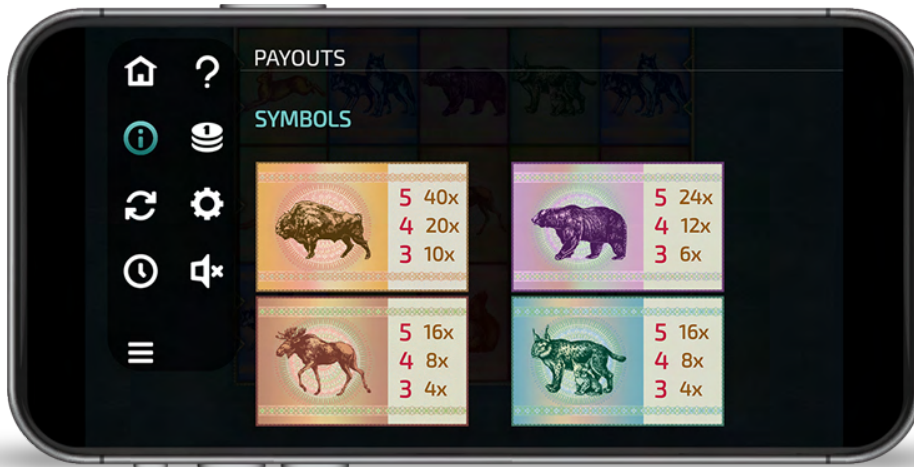

243 RESPIN FEATURE

In the base game, when a WILD243 symbol lands on the 2nd, 3rd, or 4th reel, the game transforms to a criss cross mode with 5 win lines changing to 243 ways and a respin feature that helps boost the player's wins. Winning combinations explode and leave space for new symbols and another respin. The win multiplier increases with every new respin, starting with 1x, until it reaches the maximum of 5x multiplier.

GAME RULES

Beastie Bux is a revamped 5-reel traditional slot game that offers fantastic payouts. The game has 5 win lines paid from left to right and 8 regular symbols with a different pay level. If 3 or more of them are lined up in a sequence on a payline beginning from the leftmost position, they form a winning combination resulting in a payout.

You can choose the amount you want to bet on 5 fixed win lines (lines, for short). For spinning the reels, you can use the Spin or the Autoplay buttons.

Beastie Bux video slot game is enhanced with a special WILD symbol, which activates 243 ways to win and initiates the 243 Respin feature.

How to Play

- 1** Choose your Bet by hitting the - and + buttons below the Bet box. This game has 5 fixed win lines, which are transformed to 243 ways during the 243 Respin feature.
- 2** When you have made your bet selection, hit the Spin button to spin the reels. If the reels show a winning combination after they stop, you win according to the payout table.
- 3** When you hit the Bet Max button, you can play the maximum of credits and lines allowed in the game. After hitting the Bet Max button, the maximum amounts of credits and lines are set up.
- 4** When you use the Autoplay button, you let the computer spin the reels automatically using the fixed number of lines and bet you have chosen.
- 5** If you are not sure about your winning, hit the "i" (Payout) button in the game window to see the winning combinations. If you win on multiple lines, your winnings are added up and the total amount earned is displayed in the Win box.

BEASTIE BUY

Winning Combinations

The winning symbols must appear consecutively one after another on a given win line, starting at the leftmost reel, for the win to be granted. All wins are paid left to right. Only the highest win on a win line is paid. **The Payout** is calculated by multiplying your total bet by the winning combinations obtained during the spin. The amount you win will be added to your total credits account by once you hit the **Collect** button, or automatically if you are playing in **Autoplay** mode.

243 RESPIN Feature

In the base game when a WILD243 lands only on the 2nd, 3rd, or 4th reel, the game transforms to criss cross mode, and 5 win lines change to 243 ways, with a respin feature helping boost the wins. Here, when winning combinations are gained, they explode, leaving space for new symbols and another respin. The win multiplier starts with 1x, increases with every new respin until it reaches the maximum of 5x multiplier. Then the feature ends regardless of whether there is a win or not. The number of respins does not depend on the number of WILD symbols landing on the screen. However, to start the respin feature, at least one WILD on the 2nd, 3rd, or 4th reel as part of a winning combination is needed. During respins the WILD is only a substitute for all other symbols.

Gamble Feature

If the Gamble Feature is available, the following rules apply: After every win, if you have not reached your gamble limit, you will be presented with the Gamble button in the game window. On desktop computers, the Bet Max button changes to the Gamble button when Gamble is possible. You can choose to Collect your wins or Gamble them to double the amount. This feature is available in Autoplay mode, which collects your wins automatically.

If you choose to Gamble, a screen with a face down poker deck will appear. You will have to guess if the next card is a black or a red suite. After you choose a colour, the card will be flipped over and if your guess is right, you receive double the amount of your current win. If you do not guess the right colour, you lose your win in that spin.

BEASTIE BUY

The Gamble feature could be available also during Autoplay. To enable or disable the Gamble feature during Autoplay, you must hit the options button, which you can find under the Menu button on the screen of the game. When the player enables the Gamble feature during Autoplay, the Gamble button is enabled for half a second, instead of the Bet Max button during Autoplay. When the player hits the Gamble button during Autoplay, he/she is redirected to a screen with a face down poker card. In the Gamble screen the player has three options - 'collect win', 'gamble win', or use 'take half'. If the player uses 'collect or lose all your win', he/she is redirected back to the game screen, where Autoplay continues.

You can also use the Take Half button, which appears instead of the Bet Max Button when you enter the Gamble feature. It offers an option to save half of a player's win, which is collected and added to his/her balance after the Gamble feature ends. The remainder of a player's win can be gambled further or the Take Half option can be used again. The Take Half option ends when the half is split into two numbers with two decimal places.

The Gamble button does not show up if the won amount is greater than a certain "limit" amount (which is set by an operator). If the player is already in Gamble and his current win is greater than the limit amount, then the Gamble feature ends and the player can collect his/her win.

Game Recovery

In case you quit the game in process, all your winnings will be properly credited to your account according to the winning result produced prior to the game being prematurely terminated. If you were interrupted during the gamble feature, then you will still be able to continue with your bonus right where you left off. If your game is interrupted because of some technical issues, then once you get back to the game, it will be recovered and you start from where you stopped.

Other rules

Malfunction Voids All Pays and Playwhich collects your wins automatically.
